DUNDEE

DUNDEE CORPORATION

2012 SECOND QUARTER REPORT

DUNDEE CORPORATION
Management's Discussion and Analysis

Dundee Corporation (the "Corporation" or "Dundee Corporation") is an independent publicly traded Canadian asset management company. The Corporation is listed on the Toronto Stock Exchange ("TSX") under the symbol "DC.A".

Asset management activities are focused in the areas of the Corporation's core competencies and include real estate and infrastructure, energy and resources and, more recently, the agricultural sector. These activities are carried out by the Corporation's subsidiary, Goodman Investment Counsel Inc. ("GIC") (formerly Ned Goodman Investment Counsel Limited), a registered portfolio manager and exempt market dealer across Canada and an investment fund manager in the province of Ontario, and by Dundee Real Estate Asset Management ("DREAM"), the asset management division of Dundee Realty Corporation ("Dundee Realty"), the Corporation's real estate operating subsidiary. The asset management activities of GIC and DREAM are supported by the Corporation's ownership in Dundee Capital Markets Inc. ("Dundee Capital Markets"), which is also the asset manager of Dundee Corporation's flow-through limited partnership business carried out through the "CMP", "CDR" and "Canada Dominion Resources" brands.

Dundee Corporation also owns and manages direct investments in these core focus areas, through ownership of both publicly listed and private companies. Real estate operations are carried out through Dundee Realty, an owner, developer and manager of residential, commercial and recreational properties in North America and Europe. Real estate operations are complemented by the Corporation's 24% interest in Dundee International Real Estate Investment Trust ("Dundee International REIT"), an unincorporated, open-ended real estate development trust that invests in commercial property exclusively outside of Canada, as well as a 6% interest in Dundee Real Estate Investment Trust ("Dundee REIT"), a Canadian real estate investment trust.

Energy and resource operations include the Corporation's ownership in Dundee Energy Limited ("Dundee Energy"), an oil and natural gas company with a mandate to create long-term value through the development of high impact energy projects. The Corporation also holds several other investments in the resource sector, several of which are accounted for using the equity method of accounting.

Agricultural activities are carried out through a newly formed entity, Dundee Agricultural Corporation ("Dundee Agricultural"). Dundee Agricultural has a 76% interest in Blue Goose Capital Corporation ("Blue Goose"), a privately owned Canadian company with a leading position in the organic and natural beef production market. Blue Goose currently operates in both British Columbia and Ontario.

This Management's Discussion and Analysis ("MD&A") has been prepared with an effective date of August 9, 2012 and provides an update on matters discussed in, and should be read in conjunction with the Corporation's audited consolidated financial statements as at and for the year ended December 31, 2011 (the "2011 Audited Consolidated Financial Statements") and the unaudited condensed interim consolidated financial statements as at and for the three and six months ended June 30, 2012 (the "June 2012 Interim Consolidated Financial Statements"), prepared using International Financial Reporting Standards ("IFRS"). All amounts are in Canadian dollars unless otherwise specified. Tabular dollar amounts, unless otherwise specified, are in thousands of dollars, except for per share amounts.

BASIS OF PRESENTATION

The ownership structure of the Corporation's various investments is diverse, which results in differences in the method of accounting for such investments.

- **Subsidiaries** include those direct investments over which the Corporation has the power to govern the financial and operating policies of the investment, generally through ownership of 50% or more of voting control. Subsidiaries are not recorded as individual investments in the Corporation's consolidated financial statements. Instead, subsidiaries are consolidated, with 100% of the subsidiaries' accounts recorded on a line-by-line basis within the Corporation's consolidated statements of financial position and consolidated statements of operations. The share of assets, liabilities, net earnings or loss and other comprehensive income or loss ("OCI") not attributable to the Corporation are reported in the Corporation's consolidated financial statements as *"Non-controlling interest"*.

- **Equity accounted investments and real estate joint venture investments** include those investment structures over which the Corporation may exert significant influence, but not control, or over which it has joint control over their financial and operating policy decisions. The carrying values of equity accounted investments are initially recorded at cost and are subsequently adjusted by the Corporation's share of net earnings or loss, less any dividends or distributions received, and the Corporation's share of OCI generated by the investment company. The carrying value of an equity accounted investment is also adjusted to reflect any dilution in the Corporation's ownership interest. The share of net earnings and OCI from equity accounted investments, as well as any gain or loss resulting from a dilution in ownership interest, are reported in the Corporation's consolidated statements of operations as *"Share of earnings or OCI from equity accounted investments"*. Dividends or distributions received from equity accounted investments are not reported as revenues. Rather, any amounts received are reported in the Corporation's financial statements as a reduction in the carrying value of the equity accounted investment.

- **Brokerage securities owned and securities sold short** are those direct investments that are held for trading in the short term, generally through the capital markets segment. These investments are carried on the Corporation's consolidated statements of financial position at their fair values, with changes in their fair values included in the Corporation's revenue.

- **Investments** include all other direct investments held by the Corporation. These investments may include equity or debt securities in investee companies. Equity securities have been designated as available-for-sale securities ("AFS Securities") and are carried on the Corporation's consolidated statements of financial position at their fair values. However, unlike brokerage securities owned and securities sold short, changes in the fair values of equity securities designated as AFS Securities are temporarily included in OCI until the direct investment is sold or becomes impaired, at which point cumulative amounts previously included in OCI are transferred to net earnings.

The following table summarizes the Corporation's significant direct investments and provides information in respect of the Corporation's percentage ownership interest in the investment company, the accounting treatment used to account for each direct investment, the carrying value of the direct investment (other than for consolidated subsidiaries) and the market values for direct investments that are publicly listed securities, determined using quoted trading prices as at June 30, 2012.

Investment Holding	Accounting Treatment	($000's) Carrying Value	($000's) Market Value	30-Jun-12 Percentage Controlled	31-Dec-11 Percentage Controlled

1. On February 1, 2012, the Corporation completed the acquisition of Dundee Capital Markets from non-controlling shareholders, increasing its ownership in Dundee Capital Markets to 100%.

Performance Measures

(In alphabetical order)

The Corporation believes that important measures of operating performance, including the operating performance of its subsidiaries, include certain performance measures that are not defined under IFRS and as such, may not be comparable to similar performance measures used by other companies. Throughout this MD&A, there will be references to certain performance measures which management believes are relevant in assessing the economics of its business. While these performance measures are not formally recognized by IFRS, the Corporation believes that they are informative and provide further insight as supplementary measures to net earnings and cash flows.

- **"AUA" or "Assets under Administration"** represent the approximate period-end market value of client assets administered by Dundee Capital Markets' brokerage subsidiary and in respect of which the subsidiary earns commission revenue and other similar fees from clients. AUA are not included in the Corporation's consolidated statements of financial position.

- **"AUM" or "Assets under Management"** represent the period-end market value of client assets managed by the Corporation's capital markets and asset management subsidiaries on a discretionary basis and in respect of which these subsidiaries earn management fee revenue and, in certain cases, performance fee revenue. AUM are not included in the Corporation's consolidated statements of financial position.

- **"Barrel of Oil Equivalent"** or "boe" is calculated at a barrel of oil conversion ratio of six thousand cubic feet ("Mcf") of natural gas to one barrel ("bbl") of oil (6 Mcf to 1 bbl), based on an energy equivalency conversion method which is primarily applicable at the burner tip and does not always represent a value equivalency at the wellhead.

- **"Contribution Margin" or "Margin"** is an important measure of earnings in each business segment and generally represents core revenues less cost of sales, and excludes related general and administrative expenses, depreciation and depletion, interest expense, and income taxes.

- **"Fair Value"** is determined using quoted market prices, if available. Where quoted market values are not available, the Corporation generally uses cost as a proxy for fair value.

- **"Field Level Cash Flows"** is calculated as revenue from oil and natural gas sales, less royalties and cost of sales. Field level cash flows contribute to the funding of the Corporation's working capital, including debt management, as well as to the funding of capital expenditure requirements for these resource-based business activities.

- **"Field Netbacks"** refer to field level cash flows expressed on a measurement unit or barrel of oil equivalent basis.

- **"Per Day Amount" or ("/d")** is used throughout this MD&A to reflect oil and gas production volumes on an average per day basis.

- **"Probable Reserves"** are those additional reserves that are less certain to be recovered than proved reserves. It is equally likely that the actual remaining reserves quantities recovered will be greater or less than the sum of the estimated proved plus probable reserves.

- **"Proved Reserves"** are those reserves that can be estimated with a high degree of certainty to be recoverable. It is likely that the actual remaining reserves quantities recovered will exceed the estimated proved reserves.

- **"Reserve Life Index"** is determined by dividing proved reserves by expected annual production. For greater certainty, the reserve life index includes only proved reserves and does not include probable or possible reserves.

OPERATING SEGMENTS

Real Estate

The Corporation's real estate segment includes the operating activities of Dundee Realty, one of Canada's leading, privately owned real estate companies. The scope of Dundee Realty's business includes residential land development, housing and condominium development, and residential and commercial property ownership across Canada and in the United States. The Corporation also invests directly in public real-estate based companies, including its 24% interest in Dundee International REIT, its 6% interest in Dundee REIT, and its 22% interest in 360 VOX Corporation. Additional information regarding these direct investments may be accessed at *www.dundeeinternational.com*, *www.dundeereit.com* and *www.360vox.com*, respectively.

Resource

Operating activities in the resource segment are carried out through Dundee Energy (*www.dundee-energy.com*), a company involved in oil and gas production in Ontario and the development of a natural gas storage facility in Spain, and through Eurogas International Inc. ("EII") (*www.eurogasinternational.com*), a company which carries out oil and gas exploration and evaluation activities in Tunisia. The Corporation also holds a direct investment in Nichromet Extraction Inc. ("Nichromet"), *(www.nichromet.com)*, an exploration and development stage company. Nichromet has developed proprietary metallurgical processes for the extraction of base metals and precious metals, which are in the testing phase. The Corporation's 23% interest in Dundee Precious Metals Inc. ("Dundee Precious") (*www.dundeeprecious.com*), which is accounted for on an equity basis, is also included in the resource segment.

Agriculture

The agriculture segment consists of the business activities of Dundee Agricultural, a wholly owned subsidiary of the Corporation. Operating activities in the agriculture segment are carried out by the Corporation's 76% interest in Blue Goose, a company involved in organic and natural beef production. Blue Goose operates in excess of a million acres of deeded and leased land in British Columbia and Ontario, Canada.

Asset Management

The asset management segment includes the activities undertaken by GIC and DREAM. At June 30, 2012, GIC and DREAM provided sub-advisory and investment services to approximately $11.3 billion of AUM. GIC also provides investment services in respect of the Corporation's direct investments, which include both publicly traded and private companies in a variety of industry sectors, as well as liquid securities such as mutual funds. The asset management segment also includes general corporate overhead costs, as well as interest and debt servicing costs, to the extent that such costs have not been specifically allocated to any other operating segment.

Capital Markets

Dundee Capital Markets' core activities consist of investment banking, institutional equity sales and trading and equity research. Dundee Capital Markets has aligned its principal focus into specific sector coverage including resources, real estate and infrastructure, complementing the core focus areas of the Corporation's asset management activities. Dundee Capital Markets is also the manager of certain flow-through resource limited partnership investment management products carried out through the "CMP", "CDR" and "Canada Dominion Resources" brands.

DEVELOPMENTS IN THE FIRST HALF OF 2012

- **Assets under management and administration increased 22% to $15.0 billion**
- **Revenue and contribution margins in land and housing operations increased over 50%**
- **Reflecting global economic concerns, the Corporation's investment portfolio of AFS Securities depreciated by $152.9 million in the second quarter, and $9.0 million since December 30, 2011. Market depreciation is generally included in OCI.**
- **Continued expansion into the agricultural sector with additional investments in fisheries**
- **Completed the purchase of non-controlling interest in Dundee Capital Markets, giving the Corporation 100% ownership interest**

Growth in AUA and AUM

The Corporation continues to grow its asset management base, with AUA and AUM increasing to $15.0 billion at June 30, 2012, an increase of 22% over AUA and AUM of $12.3 billion at December 31, 2011. A significant part of this growth occurred in the real estate asset management division, which benefited from a number of successful new acquisitions of quality assets, including a 67% interest in the Scotia Plaza complex, a premier office complex located in downtown Toronto.

Real Estate Activities

Operating results from Dundee Realty's land and housing business were strong, with revenues increasing 55% and with a corresponding increase in contribution margins of over 50%. Dundee Realty continues to monitor its land inventory position and development activities in order to ensure that it is prepared to meet changing demand stemming from economic or other events.

Global Economic Concerns and Effect on Portfolio of AFS Securities

In the first quarter of this year, stock market sentiment was optimistic at the prospect of aggressive qualitative easing in the United States, Europe and China. More recently however, and faced with uncertain global growth concerns in light of the ongoing Euro zone crisis, combined with a slowing Chinese economy and unconvincing economic figures out of the United States, this market optimism has faded. As a result, the second quarter of 2012 was plagued by investors favouring risk-off assets such as bonds and fixed income securities, to the detriment of equities.

These economic factors, compounded with normal seasonality, weighed heavily on commodity prices in particular. Reflecting these global economic concerns, the fair value of the Corporation's portfolio of securities depreciated by over $150 million in the current quarter, essentially erasing the market appreciation in the Corporation's portfolio in the first quarter of the current year. Generally, changes in the fair value of the Corporation's portfolio are included in OCI.

New Agricultural Investments

In March 2012, the Corporation expanded its agricultural portfolio through the acquisition of a 14% interest in Agrimarine Holdings Inc. ("Agrimarine"), a Canadian publicly traded company operating in the fisheries sector.

In keeping with its strategy of producing clean protein, in June 2012, Blue Goose acquired a rainbow trout fish farm operating as Meeker Aquaculture ("Meeker") on Manitoulin Island, Ontario. Established in 1986, Meeker is currently licensed to produce approximately 1.0 million pounds of fish annually. Included as part of the acquisition is a fish composting operation, the genesis of which was based on unearthing an environmentally-friendly process for the disposal of fish by-products. Current production of this organic compost, created by mixing by-products from Ontario's fish and forestry industries, is upwards of 40 tonnes per week.

Acquisition of Dundee Capital Markets Inc.

The Corporation, together with senior management of Dundee Capital Markets concluded that, for a number of reasons, Dundee Capital Markets should not operate as an independent, publicly traded investment dealer. As a result, in December 2011, the Corporation began negotiations with Dundee Capital Markets that would have Dundee Corporation purchase the interest of non-controlling shareholders of Dundee Capital Markets in order to take the company private. On February 1, 2012, the Corporation successfully completed the acquisition of all outstanding common shares of Dundee Capital Markets that it did not already own for cash of $1.125 per share, by way of a court approved plan of arrangement under the *Ontario Business Corporations Act*. Total cash paid for completion of the transaction was $88.0 million.

CONSOLIDATED RESULTS OF OPERATIONS

Consolidated Net Earnings

During the six months ended June 30, 2012, the Corporation generated net earnings from continuing operations attributable to owners of the Corporation of $15.7 million or $0.20 per share on a fully diluted basis. During the first six months of the prior year, net earnings were $35.2 million or $0.44 per share on a fully diluted basis.

A two-fold increase in real estate earnings was overshadowed by the effect of global economic concerns and its impact on the Corporation's asset management and capital markets activities, both segments of which incurred substantial decreases in operating profitability. Included in the results of the asset management segment are losses from investments of $12.4 million in the first half of 2012. In the first half of the prior year, the Corporation had earned $4.1 million from these activities.

Net earnings in the first half of the prior year also included $861.2 million from discontinued operations, including a gain of $870.8 million relating to the Corporation's divestment of its 48% interest in DundeeWealth Inc. ("DundeeWealth") which was completed on February 1, 2011 and which is further described in Note 6 to the 2011 Audited Consolidated Financial Statements.

A more detailed analysis of net earnings on a segmented basis, and a discussion of the key variables affecting net earnings, is provided under the section entitled *"Segmented Results of Operations"*.

				$ 510,927	**$ 599,567**		**$ 477,093**	**$ 616,965**

1. Part of the Corporation's 24% interest in Dundee International REIT is held through Dundee Realty, the Corporation's 70% owned subsidiary, giving Dundee Corporation an effective 23% interest in Dundee International REIT.
2. The Corporation's 33% interest in Escal UGS S.L. ("Escal") is held through Dundee Energy's 74% owned subsidiary, Castor UGS Limited Partnership, giving Dundee Energy an effective 25% interest in Escal. As Escal is not publicly traded, the Corporation has not attributed any market appreciation or depreciation from the cost of its investment.
3. As there are no publicly traded market values for the Corporation's real estate joint ventures, in determining market value, the Corporation has not included any market appreciation or depreciation on these investments from its current cost.

During the first half of 2012, the Corporation invested $33.4 million in its portfolio of equity accounted investments, including $26.9 million invested pursuant to public offerings completed by Dundee REIT (see *"Real Estate Segment – Equity Accounted Investments in the Real Estate Sector"*), and $6.5 million invested in real estate joint ventures. At June 30, 2012, the market value of equity accounted investments was $600.0 million (December 31, 2011 – $617.0 million).

In the six months ended June 30, 2012, the Corporation's share of earnings from these investments was $22.4 million (six months ended June 30, 2011 – $29.3 million) and its share of OCI was $9.9 million (six months ended June 30, 2011 – $7.7 million). A detailed discussion of the operating results of significant equity accounted investments is presented under "*Segmented Results of Operations*".

Other Direct Investments

During the first quarter of 2012, and with Canadian banks posting their third consecutive year of higher earnings after the 2008 global financial crisis, the Corporation's portfolio of investments, excluding equity accounted investments, increased by $143.9 million, including $93.1 million relating to the Corporation's investment in shares of The Bank of Nova Scotia ("Scotiabank") which it received as consideration for its divestment of DundeeWealth. However, uncertain global growth prospects in the second quarter of 2012 exerted downward pressure on market prices and, reflective of these economic conditions, the fair value of the Corporation's portfolio of investments decreased by $152.9 million during this period, including $59.2 million relating to the Corporation's investment in Scotiabank. At June 30, 2012, the fair value of the Corporation's investment portfolio, excluding its investments in equity accounted entities, was $1.4 billion, including $0.8 billion relating to its investment in Scotiabank.

	Three Months ended 30-Jun-12	Six Months ended 30-Jun-12
Fair value of investments, beginning of period	$ 1,594,156	$ 1,484,969
Transactions during the period		
New investments	104,826	147,351
Proceeds from sales of investments	(190,736)	(267,895)
Changes in fair values	(152,883)	(9,033)
Other transactions	(1,111)	(1,140)
Fair value of investments, end of period	**$ 1,354,252**	**$ 1,354,252**
Represented by:		
Publicly traded securities		$ 1,035,105
Private investments		164,915
Mutual funds and other short term investments		5,958
Debt securities (at amortized cost)		148,274
		$ 1,354,252

Consistent with its investment approach in the first quarter of this year, new investments made by the Corporation continue to be primarily in the resource, agricultural and energy sectors. The Corporation is also realigning a portion of its available capital into high yield income products that are supported by investments in its core focus areas. During the second quarter of 2012, the Corporation invested a total of $104.8 million in its investment portfolio. New investments were funded using proceeds on dispositions of other investments, which totalled $190.7 million in the second quarter of 2012.

SEGMENTED RESULTS OF OPERATIONS

Six months ended June 30, 2012 compared with the six months ended June 30, 2011

REAL ESTATE SEGMENT

Dundee Realty Corporation

RESULTS OF OPERATIONS

Real estate operations generated contribution margins of $37.2 million or 21.7% on revenue of $171.5 million for the six months ended June 30, 2012. This compares with contribution margins of $24.6 million or 22.2% on revenue of $110.7 million during the same period of the prior year.

Land Margins

Revenue from land sales in the first half of 2012 was $71.1 million, generating contribution margins of $18.6 million or 26.2%. This compares with revenue of $48.8 million, generating contribution margins of $13.1 million or 26.8% in the same period of the prior year. The $5.5 million increase in absolute operating margin resulted primarily from a higher number of lot sales, primarily in Regina and Calgary. The contribution margin rate on land dropped slightly on a period-over-period basis. The decrease is due, in part, to a profit participation agreement related to Dundee Realty's Stonebridge project in Saskatoon that is in effect as of 2012, as well as the mix of lot types and sizes sold during the period.

Dundee Realty sold 493 lots at an average selling price of $116,000 per lot in the first half of 2012 compared to 430 lots, also at an average selling price of $116,000 per lot, in the first half of 2011. Dundee Realty also sold 27 parcel acres at an average selling price of $506,000 per acre in the first half of 2012 compared to 13 parcel acres sold at an average selling price of $456,000 per acre in the first half of the prior year.

Housing Margins

Revenue from sales of housing units decreased by $0.7 million to $35.3 million in the six months ended June 30, 2012, as compared to the same period of the prior year, primarily attributable to lower sales of homes at Dundee Realty's Rutherford Contwo project in Toronto as this development is nearing completion. Partially offsetting the declining sales in Toronto was an increase in revenue from single family homes in Regina and Saskatoon.

During the six months ended June 30, 2012, western Canada housing operations sold 115 units at an average selling price of $388,000 per unit, translating into a $4.5 million contribution margin. This compares with a $3.6 million contribution margin in the same period of 2011, when 84 units were sold at an average selling price of $427,000 per unit. The decline in the average selling price is skewed by the sale of a luxury home in Regina during the first half of the prior year, significantly increasing the average selling price during that period.

Condominium Margins

During the first six months of 2012, revenue from sales of condominium units increased by $29.2 million to $33.9 million. The increased revenue stems from first year sales of 182 condominium units at Dundee Realty's Corktown Phase Two project and 55 units at Dundee Realty's 2 Gladstone Avenue project, both located in Toronto. Condominium sales are dependent upon the timing of completion of development projects, and may vary significantly on a period-over-period basis.

Management is continuing with a program to fund vendor-take-back mortgages that will allow purchasers to obtain the necessary financing needed to complete a purchase of a condominium unit at Dundee Realty's Base Camp project in Colorado. In the six months ended June 30, 2012, Dundee Realty sold three units and generated revenue of $0.8 million at the Base Camp project. This compares with the sales of 10 units in the same period of the prior year, generating revenue of $3.3 million. At June 30, 2012, there were 21 additional units available for sale.

Margins from Investment Properties

Revenue from investment properties increased to $3.2 million in the six months ended June 30, 2012 from $2.9 million in the same period of the prior year. However, increased operating costs reduced contribution margins marginally to $1.4 million or 43.1% from $1.5 million or 52.1% in the same period of the prior year.

Fair Value Changes in Investment Properties

Changes in the fair value of investment properties are not included in real estate contribution margins, but are separately included in net earnings from real estate operations. During the six months ended June 30, 2012, the fair value of investment properties increased by $5.6 million, mainly due to increased rental rates and lower capitalization rates since December 2011. Fair values were determined using the discounted cash flow method which discounts the expected future cash flows, generally over a term of 10 years, and uses discount rates and terminal capitalization rates specific to each property. The determination of fair values of investment properties is supplemented by third-party appraisals in certain circumstances.

Margins from Income-Producing Properties

Although revenue from income-producing properties increased to $22.0 million in the six months ended June 30, 2012 from $15.9 million in the same period of the prior year, contribution margins declined to $3.2 million from $4.0 million on a period-over-period basis. Due to record low levels of snowfall, Dundee Realty's ski operations in Colorado, including Arapahoe Basin, contributed $1.7 million to contribution margins, a decline of 60.1% from the same period of the prior year.

Dundee Realty's 17% interest in the King Edward Hotel experienced a decline in revenue to $1.8 million from $2.0 million in the same period of the prior year, reflecting lower hotel suite rental income as a result of condominium construction.

Land Held for Development and Land Under Development

At June 30, 2012, Dundee Realty's portfolio of land held for development and land under development consisted of 5,065 acres and 945 development lots, extending across both Canada and the United States. The carrying value of Dundee Realty's land portfolio increased to $257.5 million at June 30, 2012, from $240.7 million at December 31, 2011. Development costs during the six months ended June 30, 2012 were approximately $33.8 million and were incurred primarily in western Canada. Dundee Realty estimates that it will spend a further $124.2 million on development activity in this region in 2012. Funding will be provided from operating cash flow as well as Dundee Realty's borrowing facilities.

Included in Dundee Realty's joint venture investments is its 20% interest in Firelight Infrastructure Fund ("Firelight"). At June 30, 2012, Dundee Realty's carrying value of this investment was $27.0 million. Firelight focuses on renewable energy projects and is currently invested in RMS Energy Dalhousie Mountain LP, which completed its first project in 2010, with the successful commissioning of the RMS Dalhousie Mountain wind farm in Pictou County, Nova Scotia.

As part of its commitment to invest $150 million in solar energy projects over a three-year period, during the first half of 2012, Firelight acquired two additional rooftop solar projects for $2.3 million. The acquired solar projects include power purchase agreements for renewable energy with the Ontario Power Authority to supply energy at a fixed rate of 63.5 to 71.3 cents per KWH for 20 years. With these additional acquisitions, Firelight currently holds eight solar rooftop projects in its portfolio, and it has a further eight rooftop systems currently under construction.

The most recent acquisitions provide accretive value to Firelight's existing alternative energy portfolio, which already included the Sandhurst and Rutley projects, two 10 MW ground mount solar projects located outside of Kingston, Ontario; its 50% interest in Erie Ridge, an 8.5 MW solar farm; and a joint venture agreement to acquire a 49% interest in a 31.5 MW wind power project located near Amherst, Nova Scotia. Firelight also holds a 96% interest in Xeneca Limited Partnership, through which it invests in the development of water power sites in Ontario.

Real Estate Debt

Real estate debt as at June 30, 2012 was $205.6 million (December 31, 2011 – $210.5 million) including $73.0 million relating to a revolving term credit facility, with the balance divided among mortgages on investment properties, income-producing properties, land servicing loans, vendor-take-back financing of land purchases and housing construction loans. Debt is generally secured by charges on specific properties to which the debt relates. As at June 30, 2012, $32.5 million (December 31, 2011 – $43.9 million) of aggregate debt in the real estate segment was subject to a fixed, weighted average interest rate of 7.09% (December 31, 2011 – 7.46%) and matures between 2012 and 2016. A further $173.1 million (December 31, 2011 – $166.6 million) of real estate debt is subject to a weighted average variable interest rate of 4.02% (December 31, 2011 – 4.12%) and matures between 2012 and 2018.

Borrowings under Dundee Realty's revolving term credit facility are available up to a formula-based maximum not to exceed $190 million, including $40 million relating to a "bulge" commitment established in November 2011. The facility bears interest at prime plus 1.25% or at the corporate bankers' acceptance rate plus 2.50% as at June 30, 2012. The "bulge" commitment expires on September 15, 2012, while the original balance of $150.0 million expires on November 30, 2013. The facility is secured by a general security agreement and first charges against lots and parcels, as well as certain land held for development in western Canada. At June 30, 2012, Dundee Realty had drawn $155.3 million against its revolving term credit facility, including $82.3 million in the form of letters of credit.

Dundee REIT

Dundee REIT is an unincorporated, real estate investment trust and is a leading provider of high quality, affordable business premises. It is focused on owning, acquiring, leasing and managing urban and suburban office and industrial properties in Canada. Real estate activities in Dundee REIT have grown significantly in period-over-period revenues and contribution margins, reflecting the improved quality of its real estate portfolio. On June 15, 2012, Dundee REIT announced the completion of the acquisition of a 67% interest in the Scotia Plaza complex in downtown Toronto, one of Canada's premier real estate office buildings, for a total purchase price of approximately $1.3 billion. At June 30, 2012, Dundee REIT's portfolio consisted of approximately 27.6 million square feet of gross leaseable area across Canada, excluding properties classified as held for sale and redevelopment.

During the first quarter of 2012, Dundee REIT issued 12,580,347 units for the $434.8 million acquisition of Whiterock Real Estate Investment Trust. In addition, Dundee REIT issued a further 6,555,000 units pursuant to a public offering which generated gross proceeds of $231.7 million. During the second quarter of the current year, Dundee REIT issued an additional 10,392,550 units, generating gross proceeds of $373.1 million, which were used to partially fund the acquisition of Scotia Plaza. During the first half of 2012, the Corporation purchased 754,800 units of Dundee REIT at a cost of $26.9 million pursuant to these public offerings and, at June 30, 2012, the Corporation held 6,027,881 units in Dundee REIT, representing a 6% equity interest. At June 30, 2012, the market value of the Corporation's investment in Dundee REIT was $229.8 million.

During the six months ended June 30, 2012, Dundee REIT generated net earnings of $99.6 million (six months ended June 30, 2011 – $110.3 million). Net earnings include a fair value gain of $49.9 million (six months ended June 30, 2011 – $59.5 million) in respect of Dundee REIT's investment properties and a fair value loss of $24.8 million (six months ended June 30, 2011 – fair value gain of $4.8 million) in respect of investment properties that are equity accounted by Dundee REIT. Changes in fair values of investment properties may cause significant variations in net earnings.

The Corporation's share of earnings from its investment in Dundee REIT for the six months ended June 30, 2012 was $8.3 million. This compares with net equity earnings of $10.0 million in the same period of the prior year. Dundee Corporation received distributions from Dundee REIT of $6.2 million during the six months ended June 30, 2012 (six months ended June 30, 2011 – $5.0 million), of which $1.2 million were reinvested in Dundee REIT as part of its dividend reinvestment program (six months ended June 30, 2011 – $1.1 million). The Corporation continues to account for its investment in Dundee REIT on an equity basis, as it continues to exert significant influence over the operations and financial results of Dundee REIT.

Dundee International REIT

Dundee International REIT is a Canadian real estate investment trust that provides investors with the opportunity to invest in commercial real estate exclusively outside of Canada. At June 30, 2012, Dundee International REIT's portfolio consisted of 294 properties with approximately 12.8 million square feet of gross leaseable area, all located in Germany.

In April 2012, Dundee International REIT issued 4,600,000 units pursuant to a bought deal financing, generating proceeds of $46.5 million. At June 30, 2012, the Corporation held 12.8 million units of Dundee International REIT, representing a 24% equity interest. At June 30, 2012, the market value of the Corporation's investment in Dundee International REIT was $127.0 million.

During the six months ended June 30, 2012, Dundee International REIT reported net earnings of $15.9 million. Net earnings included a fair value loss of $3.9 million in respect of Dundee International REIT's investment properties.

The Corporation's share of earnings from its investment in Dundee International REIT for the six months ended June 30, 2012 was $7.2 million. During this period, the Corporation received cash distributions from Dundee International REIT of $5.1 million.

360 VOX Corporation ("360 VOX")

Through a series of transactions, the Corporation holds a 22% interest in 360 VOX, a publicly traded company listed on the TSX Venture Exchange under the symbol "VOX". 360 VOX is engaged in the business of developing international hotel, resort, residential and commercial properties. 360 VOX's current development projects are in Cuba, where 360 VOX operates through a 50% joint venture with Grupo Hotelero Gran Caribe S.A., an agency of the Cuban government.

At June 30, 2012, Dundee Corporation held 48 million shares of 360 VOX with a market value of $5.8 million. During the six months ended June 30, 2012, equity losses from the Corporation's investment in 360 VOX were $0.6 million.

RESOURCE SEGMENT

During the six months ended June 30, 2012, the resource segment generated net earnings of $2.7 million, compared with net earnings of $15.2 million in the six months ended June 30, 2011. Net earnings in the first six months of the prior year included $13.4 million of equity accounted earnings from the Corporation's investment in Breakwater Resources Ltd. ("Breakwater"), which was subsequently sold in the latter half of 2011.

For the six months ended June 30,		2012		2011
Net loss from operations	$	(3,846)	$	(3,597)
Net earnings from equity accounted investments		6,509		18,828
Net earnings from the resource segment	$	2,663	$	15,231

Dundee Energy Limited

Through its wholly owned subsidiary, Dundee Energy Limited Partnership ("DELP"), Dundee Energy holds a 95% working interest in 84,000 acres of onshore oil properties and a 65% working interest in 904,000 acres of offshore gas properties located in and around Lake Erie in southern Ontario. In addition to the oil and gas rights associated with these properties, DELP owns six onshore oil facilities, and holds a 65% ownership interest in an offshore fleet of drilling and completion barges and six gas plants and compressor stations that process offshore dry gas at onshore locations.

RESULTS OF OPERATIONS

Oil and Gas Revenue

In the first half of 2012, oil and gas sales, net of royalty interests, were $15.6 million, a decrease of $2.0 million from $17.6 million earned in the first six months of 2011. Despite an increase in oil production volumes, net sales were adversely affected by decreases in commodity prices, including a significant decrease in the price for natural gas.

West Texas Intermediate (WTI) ($/bbl)			98.70			95.79

* Before royalty payments

Natural gas prices as reported by NYMEX fell below the US$2.00/Mcf in April 2012, as relatively warmer winter weather diminished demand, at the same time as new discoveries and technological changes resulted in a surplus of supply. More recently, the price of natural gas has rebounded marginally to approximately US$2.74/Mcf at June 30, 2012, reflecting, in part, increased consumption of electrical energy powered by natural gas in response to unusually high summer temperatures. During the first half of 2012, Dundee Energy realized an average price on sales of natural gas of $2.92/Mcf, a decrease of 38% from the average price of $4.70/Mcf realized in the same period of the prior year.

During the first half of 2012, concern over slowing global growth and uncertainties in the Euro zone have placed downward pressure on the price for crude oil. In addition, Saudi Arabia's overproduction in the first half of 2012, meant to make up for lost Iranian supply in the wake of expected sanctions, sparked a sharp drop in global prices. These economic factors are reflected in the substantial volatility of the West Texas Intermediate ("WTI") Crude Oil price, which reached a high of US$109.39/bbl and a low of US$77.72/bbl during the first half of 2012. Similar to the volatility in the WTI oil price, the Edmonton Par price reached a high of $107.07/bbl and a low of $71.14/bbl during the first half of 2012. During this period, Dundee Energy realized an average price on sales of oil of $92.37/bbl (six months ended June 30, 2011 – $98.79/bbl), representing a 4% premium (six months ended June 30, 2011 – 3%) to the Edmonton Par average price during the same period.

Field Level Cash Flows and Field Netbacks

For the six months ended June 30,			2012			2011

					$ 2,514

CHANGES IN FINANCIAL CONDITION

Capital Expenditures

Dundee Energy incurred capital expenditures of $5.9 million in the six months ended June 30, 2012, all in southern Ontario. During the remainder of the year, Dundee Energy's capital programs, budgeted at $7.1 million, will continue to focus on onshore oil projects and will include a number of workover initiatives to optimize oil and natural gas production from existing fields. Due to current natural gas prices, Dundee Energy will limit its offshore program in 2012.

Dundee Energy has recorded decommissioning liabilities representing its best estimate of costs that it will incur to settle future site restoration, abandonment and reclamation obligations. At June 30, 2012, Dundee Energy's estimate of these future costs on an undiscounted basis was approximately $83.0 million and $46.0 million on a discounted basis, and are expected to be incurred over a 49-year period.

Demand Revolving Credit Facilities

On June 29, 2010, and concurrent with DELP's acquisition of the assets in southern Ontario, Dundee Energy arranged for an $80.0 million credit facility for the benefit of DELP. Subsequent to June 30, 2012, DELP's credit facility was amended to reduce amounts available pursuant to the credit facility from $80.0 million to $70.0 million. There were no other material changes to the terms of the credit facility as a result of the amendment. The credit facility is structured as a demand revolving loan, and is subject to a tiered interest rate structure that varies based on the net debt to cash flow ratio generated by DELP. The rate is initially set at prime plus 3% for loans and letters of credit or, for bankers' acceptances, at the bankers' acceptance rate plus 4%. At June 30, 2012, an aggregate of $63.4 million had been drawn against the facility and as required by statute, DELP had further issued a letter of credit for $3.3 million in favour of the Ministry of Natural Resources in connection with decommissioning liabilities.

Eurogas International Inc.

EII is currently conducting exploration and evaluation programs for oil and natural gas offshore Tunisia in the Gulf of Gabes, where it holds a 45% joint venture interest in the 1.0 million acre Sfax permit and the related Ras El Besh development concession. The Corporation's carrying value of EII's Tunisian properties at June 30, 2012 was $9.5 million (December 31, 2011 – $8.8 million).

Force Majeure

As a result of political uncertainty and civil unrest in Tunisia, on January 18, 2011, EII announced that, together with its joint venture partner, Atlas Petroleum Exploration Worldwide Ltd. ("APEX"), it had declared a condition of Force Majeure with respect to its interest in the Sfax permit and the associated Ras El Besh development concession. EII believes that the declaration of Force Majeure allowed EII and APEX to suspend their activities, while the conditions resulting in the Force Majeure continued.

On June 19, 2009, the Tunisian government approved an extension on the Sfax permit, extending the original term to December 8, 2011. As a condition of the extension, the joint venture partners committed to drill an exploration well to a required depth during the extension period. On June 23, 2011, the Tunisian government further extended the period of the Sfax permit to December 8, 2012, with no additional commitment. Based on current information, EII estimates that its share of the cost to meet this commitment ranges between US$6 million and US$9 million. In the event that this work commitment is not completed, a compensatory payment of up to US$12 million will be payable by the joint venture partners in the Sfax permit to the Tunisian regulatory bodies.

Dundee Precious Metals Inc.

Dundee Precious is a Canadian based international mining company engaged in the acquisition, exploration, development, mining and processing of precious and base metals in Bulgaria, Namibia, Armenia and Serbia.

For the six months ended June 30, 2012, revenue from sales generated by Dundee Precious was US$182.3 million, an increase of US$44.8 million over revenue of US$137.5 million generated in the same period of the prior year. The growth was mainly attributable to an increase in deliveries of concentrates, higher volumes of payable gold and copper in concentrate sold and higher average market prices for gold, partially offset by lower volumes of concentrate smelted and lower average market prices for copper. Revenue less cost of sales ("Gross Profit") from mining operations was US$76.3 million for the six months ended June 30, 2012, compared with US$40.8 million in the same period of the prior year. The increase in Gross Profit is consistent with the growth in net revenue, reflecting increases in the deliveries of concentrates as well as higher gold prices.

Dundee Precious reported net earnings attributable to common shareholders of US$17.8 million in the six months ended June 30, 2012, compared with US$23.2 million in the same period of the prior year. The decrease in net earnings was due primarily to unrealized mark-to-market losses related to Dundee Precious' investment in special warrants of Sabina Gold & Silver Corporation, lower concentrate smelted and higher administrative and exploration expenses.

Instructions issued by the Namibian Minister of Environment and Tourism in April 2012 required Dundee Precious to implement a reduction in feed to its smelter. In July 2012, a technical committee of the Ministry, with the approval of the Minister, authorized a production increase to 75% of the smelter's normal operating capacity. The increase has a significant impact to Dundee Precious as, at this level, the smelter is capable of processing all current and future concentrate production by Dundee Precious from its Chelopech mine in Bulgaria.

Escal UGS S.L.

Dundee Energy holds an indirect interest in the Castor underground gas storage project, a Spanish infrastructure project that has converted the abandoned Amposta oil field, located off the eastern Mediterranean coast of Spain, to a natural gas storage facility (the "Castor Project"). Further details as to the construction of the Castor Project and the associated remuneration system are detailed in Dundee Energy's management's discussion and analysis as at and for the six months ended June 30, 2012, which may be accessed at *www.sedar.com* or at *www.dundee-energy.com*.

Escal has established a hedging strategy to mitigate its exposure to interest rate risk associated with the project financing for the Castor Project. At June 30, 2012, the fair value of Escal's obligations in respect of these hedging strategies was approximately €72.8 million (December 31, 2011 – €74.8 million). Recording its share of Escal's obligations in respect of these hedging contracts would draw the Corporation's investment in Escal to below zero. Accordingly, the Corporation has not recognized its share of $27.0 million of these losses, as it does not have the legal or constructive obligation in respect thereof.

From 2010 to June of 2012, Escal issued shares from treasury with a par value of €14,000. In order to maintain its 33% interest, Dundee Energy indirectly subscribed for one third of the newly issued par value shares at an aggregate cost of $6,000 (€5,000). During this time, and in order to meet the equity ratios as required by the project financing for the Castor Project, the majority shareholder also contributed a share premium of €40.9 million and issued €64.2 million in subordinated loans. The Corporation has not recognized the benefit of its 33% interest in the share premium and in the subordinated loans as the realization and measurement is subject to a number of risks and uncertainties, including but not limited to, execution risk associated with the construction of the project, the availability and terms of future financing arrangements and the 50-year life span of the project.

During the second quarter of 2012, the Government of Spain announced certain regulatory modifications to the remuneration regime applicable to underground gas storage facilities. Under the previous regime, eligible capital invested was to be repaid over a 10-year period beginning immediately after the commencement of operations. Regulatory modifications increase the repayment period to 20 years. Furthermore, these regulatory modifications significantly curtail the provisional remuneration available to gas storage projects during the construction period.

Escal has determined that these regulatory modifications have an unfavourable impact to the Castor Project economics and the related project financing. Consequently, Escal has entered into discussions with the Government of Spain with a view to finding solutions that would re-establish the economic value of the project. Such discussions are ongoing, with the full knowledge and involvement of the lenders to the project. Accordingly, further borrowings pursuant to the project financing arrangement have been deferred until a satisfactory agreement has been reached between the Spanish authorities, Escal, the shareholders of Escal and the lenders to the Castor Project.

In the interim, Escal has continued with the commissioning process. On July 6, 2012, Escal was granted the provisional commissioning certificate necessary to commence the injection of cushion gas into the Castor facilities. This key milestone signifies that the facility is ready for service, subject to the injection of cushion gas and certain subsequent performance testing. However, in light of the regulatory modifications discussed above, Escal has deferred the acquisition of cushion gas until such time as an acceptable agreement has been negotiated between the Spanish government and the lenders to the Castor Project. Meanwhile, Escal is ensuring that the systems and components of the Castor facilities are carefully maintained.

AGRICULTURE SEGMENT

As the world struggles with the effects of population growth, climate change, urbanization and deforestation in the upcoming decades, food security will be of paramount concern. The Corporation believes that these conditions will add value to productive farmland assets and sustainable agribusinesses, as they will be a significant part of the long-term solution. In late 2011, the Corporation created Dundee Agricultural in order to assess possible opportunities in this industry.

In December 2011, Dundee Agricultural completed its first investment in the agricultural sector by acquiring a controlling interest in Blue Goose, a Canadian private company focused on the production of clean protein. Clean protein is achieved through the raising of livestock in a purely organic environment, including feed from organically grown legumes, and by employing the highest standards of animal husbandry and welfare, with no use of artificial growth hormones or antibiotics. At June 30, 2012, Dundee Agricultural has invested $25.8 million for a 76% interest in this venture.

Blue Goose Capital Corporation

The Blue Goose Cattle Company, a wholly owned subsidiary of Blue Goose, currently provides high-quality organic and all natural beef products to markets in British Columbia. Blue Goose is pursuing an aggressive program to expand its operations of organic cattle farming. During the first six months of 2012, it invested $21.1 million on its cattle production operations.

Net assets acquired:		
Capital assets		
Land and buildings	$	14,639
Machinery and equipment		2,702
Livestock		
Biological assets		1,396
Inventory		1,889
Intangible assets		519
	$	21,145
Aggregate consideration transferred		
Cash	$	18,145
Equity issued to non-controlling interest		3,000
	$	21,145

As part of its business plan, Blue Goose has significantly expanded its land holdings to over 1.0 million acres under management. Blue Goose's land portfolio includes both freehold (deeded) acres and leasehold acreage in British Columbia and Ontario. Blue Goose seeks to acquire high quality productive acreage which is fully irrigated and which provides quality hay fields for cattle grazing.

	Number of Acres Deeded or Leased as at	
(in thousands)	June 30, 2012	March 31 2012
British Columbia	1,093	984
Ontario	2	1
	1,095	985

Blue Goose plans to continue acquiring farmland property in British Columbia and Ontario in order to implement its vertically integrated business model, which will allow it to control the production, processing and distribution of its products. As part of this business plan, Blue Goose also acquired a transportation company and it is in the process of constructing a federally regulated abattoir on one of its owned properties in British Columbia.

With the expansion of its land portfolio, Blue Goose has successfully increased its organic cattle herd to over 5,800 at June 30, 2012.

		Cattle Herd
(number of animals)	June 30, 2012	March 31 2012
Breeding cattle and bulls	1,618	1,015
Immature livestock and feeder cattle	4,272	2,829
	5,890	3,844

In addition to existing beef operations, Blue Goose is actively exploring alternative clean protein opportunities. During the second quarter of 2012, Blue Goose expanded its product line through the acquisition of an organic rainbow trout fish farm operating as Meeker Aquaculture on Manitoulin Island, Ontario. In operation since 1986 as a family-owned business, the Meeker operation is currently licensed to produce 1.0 million pounds of fish annually. The rainbow trout farm historically sold directly to the processor; however, going forward and consistent with its cattle farming business model, Blue Goose intends to reengineer and expand the business into a vertically integrated trout operation.

Included as part of Blue Goose's acquisition is a fish composting operation, the genesis of which was based on unearthing an economically-friendly process for the disposal of fish by-products. Current production of this organic compost, created by mixing by-products from Ontario's fish and forestry industries, is upwards of 40 tonnes per week.

RESULTS OF OPERATIONS

During the three and six months ended June 30, 2012, Blue Goose earned revenues of $1.9 million and $3.1 million respectively. Approximately 50% of beef sales are to a single leading retailer of natural and organic foods and has historically been focused in western Canada. As part of its business plan, Blue Goose intends to expand its brand recognition within British Columbia and expand its beef product sales into Ontario and other provinces in Canada. Similarly, Blue Goose intends to expand its sales of organic rainbow trout currently sold in Ontario by leveraging off its existing client base in western Canada.

Reflective of its current stage of development, during the first half of 2012, Blue Goose incurred a net operating loss of $3.4 million, including a loss of $1.7 million incurred in the second quarter of this year. The loss was partially offset by the recognition of a $1.1 million change in the fair value of inventory, primarily attributable to increases in cattle prices.

CHANGES IN FINANCIAL CONDITION

Changes in the Carrying Value of Livestock

The carrying value of livestock was $11.1 million at June 30, 2012, including $7.5 million of biological assets and $3.6 million of related inventory and supply items. This compares with a carrying value of $4.8 million at December 31, 2011. Approximately $4.0 million of the increase is in respect of acquisitions completed during the period, including $0.4 million relating to the acquisition of rainbow trout as part of the Meeker transaction.

	Cattle	Fish	Inventory and Supply	TOTAL
Balance, January 1, 2012	$ 4,161	$ -	$ 610	$ 4,771
Changes during the six months ended June 30, 2012				
Acquisitions	1,396	373	2,205	3,974
Herd weight	402	-	-	402
Price changes	716	-	-	716
Processed	467	-	733	1,200
Balance, June 30, 2012	$ 7,142	$ 373	$ 3,548	$ 11,063

During the six months ended June 30, 2012, Blue Goose realized a fair value gain of $1.1 million in respect of its livestock. Approximately $0.4 million of this gain reflects increases in herd weight, while the remaining $0.7 million represents changes to the price of beef.

Corporate Debt

In April 2012, Blue Goose established a five-year $10 million credit facility with a Canadian financial institution and leading lender to the agricultural industry. Amounts borrowed pursuant to the facility are subject to variable rates of interest, with the weighted average rate of 4.2% at June 30, 2012. The credit facility is secured by a first charge mortgage against various real estate assets owned by Blue Goose. At June 30, 2012, Blue Goose had drawn $8.8 million against the facility.

ASSET MANAGEMENT SEGMENT

Management Fee Revenues

For the six months ended June 30,		2012		2011
GIC				
Management fees	$	1,866	$	2,928
DREAM				
Management fees		24,280		7,721
Fees on invested capital		2,076		1,678
International operations		1,813		1,779
	$	30,035	$	14,106

Revenue from asset management activities was $30.0 million in the six months ended June 30, 2012, over twice the revenue of $14.1 million earned in the same period of the prior year. The increase corresponds directly to growth of AUM in DREAM, which increased to $10.2 billion at June 30, 2012 compared with $4.7 billion at June 30, 2011.

Goodman Investment Counsel Inc.

GIC continues to act as sub-advisor to certain DundeeWealth funds under a sub-advisory agreement, which provides GIC with a share of management and performance fee revenues as they are generated. At June 30, 2012, GIC provided sub-advisory and investment services to approximately $0.8 billion (six months ended June 30, 2011 – $2.1 billion) of DundeeWealth's AUM. GIC also provided sub-advisory services to $0.3 billion (six months ended June 30, 2011 – $0.4 billion) of investment products managed by Dundee Capital Markets.

In addition, GIC provides advisory and investment services to Ravensden Alternative Group Trust ("RAGT"), an investment entity established by GIC in late 2009. At June 30, 2012, this investment entity had raised $26.9 million, including $21.4 million invested directly by Dundee Corporation. The fair value of the Corporation's $21.4 million investment in RAGT was $25.2 million at June 30, 2012.

Dundee Real Estate Asset Management

At June 30, 2012, DREAM managed third-party assets with an estimated value of $10.2 billion (December 31, 2011 – $7.0 billion). DREAM also earns asset management revenue in respect of projects in which Dundee Realty has invested capital, including Dundee Realty's investments in real estate and infrastructure projects. During the six months ended June 30, 2012, DREAM recognized $2.1 million (six months ended June 30, 2011 – $1.7 million) of asset management revenue in respect of projects in which Dundee Realty has invested capital. The portion of revenue that is earned in respect of Dundee Realty's invested capital is eliminated in determining the Corporation's consolidated financial results.

Other Asset Management Segment Balances

Income from Corporate Investments

Dundee Corporation's investments include several public and private investments in a variety of industry sectors. During the six months ended June 30, 2012, the Corporation earned interest and dividend revenues of $23.9 million (six months ended June 30, 2011 – $30.2 million) from cash resources and its corporate investment portfolio, including dividend revenue of $19.2 million (six months ended June 30, 2011 – $26.0 million) from the Corporation's investment in Scotiabank. The Corporation also realizes a gain or loss on sale when it disposes of an investment. These realized gains or losses are included in the Corporation's net earnings.

Investments in equity securities that are designated either as financial instruments at fair value through profit and loss, or as AFS Securities, are recorded in the Corporation's consolidated financial statements at fair value. Changes in unrealized fair values of equity securities that are designated as AFS Securities are recorded as a component of OCI, subject to decreases in fair values that are considered other-than-temporary, in which case they are recorded in net earnings. However, changes in fair values of investments that are designated as financial instruments at fair value through profit and loss are recorded directly in earnings. As a result of these accounting methodologies, net earnings in the asset management division may vary significantly from period to period.

General and Administrative Expenses

Generally, head office costs, including costs associated with corporate governance and related public company costs, are accumulated and reported as head office costs and are not allocated to other operating segments. These costs were $23.6 million in the six months ended June 30, 2012 compared with $33.4 million in the same period of the prior year. General and administrative expenses in the first half of the prior year included approximately $15.0 million of expenses that were directly related to the gain earned by the Corporation following its divestment of DundeeWealth.

Corporate Interest Expense

Corporate interest expense was $11.5 million in the six months ended June 30, 2012 compared with $5.7 million incurred in the same period of the prior year, reflecting increases in average borrowings over the respective periods.

CAPITAL MARKETS SEGMENT

Dundee Capital Markets Inc.

RESULTS OF OPERATIONS

Capital markets activities incurred a loss of $2.1 million during the first half of 2012, compared with net earnings of $9.6 million earned in the same period of the prior year. Consistent with global economic concerns experienced during this period, capital markets activities in the resource industry, and the mining sector in particular, decreased significantly in the first half of 2012 compared with the same period of the prior year.

During the first six months of 2012, revenues in the capital markets segment decreased to $61.3 million, compared with $69.0 million in the same period of the prior year. Higher general and administrative costs further reduced profitability as illustrated below.

For the six months ended June 30,		2012		2011
Revenues				
Management fees	$	6,453	$	9,475
Financial services				
Investment banking		27,790		30,766
Commissions		20,024		22,972
Principal trading		2,711		(524)
Foreign exchange trading		327		2,624
Interest and dividends		3,954		3,732
		61,259		69,045
Cost of sales				
Variable compensation		(29,575)		(33,161)
Other items in net (loss) earnings attributable to the capital markets segment				
Depreciation		(812)		(431)
General and administrative		(32,726)		(25,854)
Interest expense		(177)		-
Foreign exchange loss		(97)		-
Net (loss) earnings attributable to the capital markets segment	$	(2,128)	$	9,599

Investment banking revenue, including revenues from new issues and advisory services fees, decreased to $27.8 million in the first half of 2012 compared with $30.8 million earned in the first half of 2011. During the six months ended June 30, 2012, Dundee Capital Markets participated in 89 (six months ended June 30, 2011 – 126) public and private new issue transactions, with the mining and oil and gas sectors representing 47% of new issue activity. Reflecting the decrease in the number of new issue transactions, new issue revenue decreased to $23.3 million in the six months ended June 30, 2012 compared with $30.3 million in the same period of the prior year. During this period, Dundee Capital Markets earned advisory services revenues of $4.5 million compared to $0.5 million in the same period of the prior year. Advisory services mandates are generally long term in nature, and fees are earned only on the successful completion of a contract.

Commission revenues were $20.0 million in the six months ended June 30, 2012, compared to $23.0 million earned in the same period of the prior year. Market conditions in the first half of 2012 were more challenging than the first half of 2011 as evidenced by a general decrease in trading volumes on both the TSX and the TSX Venture Exchange.

Principal trading activities generated revenues of $2.7 million in the six months ended June 30, 2012 compared with a principal trading loss of $0.5 million in the same period of the prior year, reflecting both mark-to-market gains in respect of broker warrant inventory, as well as increases in Dundee Capital Markets' portfolio of trading securities. However, revenue from foreign exchange trading in particular decreased to $0.3 million in the six months ended June 30, 2012 compared with $2.6 million earned in the same period of the prior year, reflecting a substantial decrease in activity relating to investment products managed by DundeeWealth prior to the Corporation's divestment of DundeeWealth in February 2011.

Capital markets professionals and financial advisors are compensated on a variable scale, based on revenues generated. Certain capital markets professionals may also be compensated based on the profitability of their respective division. During the first half of 2012, variable compensation expense was $29.6 million, compared with variable compensation expense of $33.2 million in the first half of the prior year. Similar to results in the first six months of the prior year, variable compensation represented approximately 55% of related financial services revenue, resulting in contribution margins of 45%.

Management Fee Revenue

Management fee revenue earned from tax assisted investment products, closed-end funds, and financial advisor accounts was $6.5 million in the six months ended June 30, 2012. This compares with $9.5 million earned in the same period of the prior year. The decrease is the result of decreased AUM as illustrated in the table below.

(in millions of dollars)

As at June 30,		2012		2011
AUA	$	2,927	$	3,436
AUM		1,020		1,434

General and Administrative Expenses

General and administrative expenses in the capital markets segment were $32.7 million in the six months ended June 30, 2012, compared with $25.9 million in the same period of the prior year. The increase is due, in part, to the costs of the restructuring process initiated by Dundee Capital Markets following its spin out from DundeeWealth in early 2011, including the separation of back office and operational systems. In addition, the capital markets segment incurred $3.7 million of restructuring costs associated with its Calgary operations as it initiated a process of enhancing its team of professionals in order to gain market share.

FINANCIAL CONDITION

Call Loan Facilities

From time to time, Dundee Capital Markets may utilize call loan arrangements to facilitate the securities settlement process for both client and principal securities transactions, or to fund margin lending. In connection with the establishment of an introducing and carrying broker arrangement with a third-party service provider, on January 1, 2012, Dundee Capital Markets arranged for an uncommitted call loan facility for up to $75 million. At June 30, 2012, there were no amounts drawn against this facility.

Other Balances Relating to Dundee Capital Markets' Investment Dealer Activities

As at June 30,	2012	2011
Client accounts receivable	$ 488,946	$ 534,462
Client deposits and related liabilities	(478,047)	(515,307)
Securities owned	101,148	56,524
Securities sold short	(13,083)	(17,889)

Client account balances represent funds owing from or belonging to clients, and amounts due to or from brokers and dealers that are pending settlement. While the amounts may vary significantly on a day-to-day basis, they do not necessarily reflect any meaningful change in Dundee Capital Markets' financial position.

Securities owned and securities sold short represent trading positions in the capital markets segment. Trading positions may also vary significantly on a day-to-day basis depending upon trading strategies in response to market conditions and in anticipation of price movements. These variances do not necessarily reflect any meaningful changes to Dundee Capital Markets' financial position. Trading positions are recorded at their fair value based on quoted prices where available, with changes in market values included in principal trading revenue.

OTHER CONSOLIDATED BALANCES AND CAPITAL STRUCTURE

Income Tax Expense

The Corporation's effective income tax rate was 48.6% for the six months ended June 30, 2012 (six months ended June 30, 2011 – 30.0%). This effective tax rate is higher than the statutory combined federal and provincial tax rate of 26.5% and can be attributed primarily to two factors; a re-measurement of the Corporation's net deferred income tax liabilities arising from the deferral, announced in the 2012 Ontario Budget, of Ontario income tax rate reductions, and the Part IV tax rate paid on dividend income which is higher than the statutory income tax rate. Non tax-deductible items including preference share dividends paid, which were classified as interest expense for accounting purposes, and stock based compensation expense also impacted the effective income tax rate, but were offset by certain non-taxable revenues.

Net Deferred Income Tax Liabilities

The Corporation's net deferred income tax liabilities at June 30, 2012 were $172.8 million, which represent deferred income tax liabilities of $200.6 million, offset by deferred income tax assets of $27.8 million. This compares to net deferred income tax liabilities of $170.7 million at December 31, 2011. Deferred income tax liabilities increased as a consequence of the re-measurement arising from the deferral of Ontario income tax rate reductions, as well as from changes relating to the real estate segment. Components of the Corporation's net deferred income tax liabilities are detailed in Note 29 to the June 2012 Interim Consolidated Financial Statements.

The Corporation's aggregate income tax loss carry forwards at June 30, 2012 were $46.6 million (December 31, 2011 – $69.3 million). Included in the Corporation's deferred income tax balances is a tax benefit of $10.9 million (December 31, 2011 – $17.0 million) in respect of these tax losses.

Corporate Revolving Term Credit Facilities – During the fourth quarter of 2011, the Corporation entered into an amended and restated credit agreement with a Canadian Schedule 1 chartered bank for borrowings up to $325 million (the "Amended Credit Facility"). The Amended Credit Facility replaced the previously existing $225 million credit facility. The Amended Credit Facility includes a $225 million revolving credit amount, which has a maturity date of November 11, 2012. In addition, the Amended Credit Facility included a $100 million fixed term amount that was partially drawn to fund the Corporation's substantial issuer bid completed in the fourth quarter of 2011. During the second quarter of 2012, amounts borrowed pursuant to the $100 million fixed term credit facility were repaid and the credit facility was extinguished.

5.85% Exchangeable Unsecured Subordinated Debentures ─ The terms of the Corporation's exchangeable debentures provide for the exchange, at the option of the holder, of one $1,000 exchangeable debenture for 33.6134 units of Dundee REIT, subject to certain conditions. The Corporation has placed sufficient units of Dundee REIT into an escrow arrangement established for the purpose of satisfying any potential obligation pursuant to the terms of the exchangeable debentures. During the six months ended June 30, 2012, debenture holders tendered $1.3 million of exchangeable debentures and received 43,020 units of Dundee REIT on the exchange.

Debt of Subsidiaries

A more detailed discussion of corporate debt in each of the Corporation's business segments is presented under "*Segmented Results of Operations – Changes in Financial Condition*".

Share Capital

As at June 30, 2012, there were 51,851,435 Subordinate Shares and 3,116,375 Class B common shares outstanding. On March 29, 2012, the Corporation announced that it had received regulatory approval for the renewal of its normal course issuer bid from April 1, 2012 to March 31, 2013. The normal course issuer bid allows the Corporation to purchase up to a maximum of 2,789,554 Subordinate Shares for subsequent cancellation, representing approximately 10% of the public float at the time approval for the normal course issuer bid was granted. The Corporation did not purchase any shares under the normal course issued bid arrangement in the second quarter of 2012. Subsequent to June 30, 2012, the Corporation acquired 234,400 Subordinate Shares at an average cost of $22.29 per share for cancellation pursuant to the normal course issuer bid. At August 9, 2012, there were 51,617,559 Subordinate Shares and 3,116,375 Class B common shares outstanding.

As at June 30, 2012, the Corporation had granted 1,290,000 options with a weighted average exercise price of $9.40, of which 501,000 were exercisable, as holders had met the vesting criteria.

The Corporation has also issued 6.0 million 5.00% cumulative redeemable first preference shares, series 1 ("Preference Shares, series 1") and 5.2 million 6.75% cumulative redeemable first preference shares, series 2 ("Preference Shares, series 2"). A full description of the terms of the Preference Shares, series 1 and Preference Shares, series 2 is provided in Note 23 to the 2011 Audited Consolidated Financial Statements.

CONSOLIDATED LIQUIDITY AND CAPITAL RESOURCES

As at June 30, 2012, the Corporation had cash of $130.3 million compared with $213.5 million at December 31, 2011. Included in the Corporation's consolidated cash balance is cash used in the operating business of Dundee Capital Markets.

Dundee Capital Markets' brokerage subsidiaries function in regulated environments and are therefore required to maintain levels of capital in liquid assets in accordance with regulatory requirements. The amount of capital that exists within these regulated entities may dictate the level of business operations, including margin lending, securities trading and corporate finance commitments. Furthermore, the ability to transfer cash resources, which, at June 30, 2012, were $116.3 million, out of these regulated subsidiaries may be limited by their requirement to comply with regulatory capital requirements.

As a registered portfolio manager and exempt market dealer across Canada and an investment fund manager in the province of Ontario, GIC is also required to maintain minimum capital as prescribed by regulation.

At June 30, 2012 and December 31, 2011, all of the Corporation's regulated subsidiaries exceeded their minimum regulatory capital requirements.

Significant Sources and Uses of Cash

During the six months ended June 30, 2012, the Corporation incurred net cash outflows of $83.2 million (six months ended June 30, 2011 – net cash inflows of $30.6 million) from continuing operations. Significant cash flow items are described below:

Significant Cash Flows – Operating Activities

For the six months ended June 30,		2012		2011
Operating activities:				
Adjusted net earnings	$	46,142	$	23,383
Changes in balances relating to investment dealer activities		(79,712)		59,022
Changes in real estate working capital		4,511		10,900
Changes in agricultural working capital		(330)		-
Changes in other working capital amounts		54,912		(12,267)
Changes in income taxes payable		(134)		(12,174)
Cash provided from operating activities	$	25,389	$	68,864

- The effect of changes in balances related to investment dealer activities, including client account balances and brokerage securities owned and sold short, will vary significantly on a day-to-day basis. Cash flow balances relating to investment dealer activities also include amounts borrowed or repaid pursuant to call loan facilities. During the six months ended June 30, 2012, these balances resulted in net cash outflow of $79.7 million (six months ended June 30, 2011 – $59.0 million net cash inflow). Changes in cash resulting from these types of transactions may not necessarily reflect any meaningful change in the Corporation's financial position, or that of its subsidiaries.
- Real estate cash flows are mainly project driven. For the six months ended June 30, 2012, Dundee Realty generated working capital of $4.5 million (six months ended June 30, 2011 – $10.9 million) from operating activities.

Significant Cash Flows – Investing Activities

For the six months ended June 30,		2012		2011
Investing activities:				
Dividends received from discontinued operations	$	-	$	155,982
Acquisitions of non-controlling interest		(88,633)		-
Net dispositions (acquisitions) of direct investments		93,647		(187,772)
Net investment in real estate operations		(13,244)		(10,177)
Net investment in resource properties		(7,874)		(3,177)
Net investment in livestock and other agricultural assets		(20,966)		-
Other investment activities		(3,702)		(4,363)
Cash used in investing activities	$	(40,772)	$	(49,507)

- In the first half of the prior year, the Corporation received a cash dividend of $156.0 million in connection with its divestment of DundeeWealth.
- During the six months ended June 30, 2012, the Corporation paid cash of $88.6 million to acquire non-controlling interests, including $88.0 million paid to acquire all of the non-controlling shareholders' interest in Dundee Capital Markets.
- Cash required or derived from trading in the Corporation's investment portfolio, including equity accounted investments, will vary from period to period and is dependent on trading activity and strategies that may evolve in response to global market conditions or otherwise. In the six months ended June 30, 2012, the Corporation generated net cash of $93.6 million from its investment portfolio (six months ended June 30, 2011 – $187.8 million net invested).
- Net real estate acquisition and development activities, including investments in real estate joint ventures, required cash of $13.2 million in the six months ended June 30, 2012 compared with $10.2 million in the first half of the prior year.
- During the six months ended June 30, 2012, the Corporation invested $7.9 million on resource activities compared with $3.2 million invested in the same period of the prior year.
- Net investments in livestock and agricultural assets for the six months ended June 30, 2012 were $21.0 million.

Significant Cash Flows – Financing Activities

For the six months ended June 30,		2012		2011
Financing activities:				
Changes in corporate debt	$	(58,675)	$	157,133
Issuance (acquisition) of Class A subordinate shares, net of costs		641		(141,511)
Dividends paid on Preference Shares, series 2		(4,388)		(4,388)
Dividends paid to non-controlling interest		(6,000)		-
Net issuance of shares by subsidiaries to non-controlling interest		584		(28)
Cash (used in) provided from financing activities	$	(67,838)	$	11,206

- Net amounts repaid pursuant to corporate debt facilities during the six months ended June 30, 2012 were $58.7 million (six months ended June 30, 2011 – $157.1 million drawn).
- During the first half of 2011, the Corporation paid $141.5 million to purchase Subordinate Shares for cancellation under its normal course issuer bid. There were no purchases pursuant to normal course issuer bid arrangements in the first six months of the current year.
- During the six months ended June 30, 2012, the Corporation paid dividends of $4.4 million (six months ended June 30, 2011 – $4.4 million) on outstanding Preference Shares, series 2. The Corporation has not paid a dividend on its Subordinate Shares or on its common shares.
- During the six months ended June 30, 2012, the Corporation's subsidiaries paid dividends of $6.0 million to non-controlling shareholders.

Cash Requirements

The Corporation's capital management and funding objectives include ensuring that the Corporation is compliant with all of its ongoing obligations, including compliance with all applicable debt covenants, and ensuring that the Corporation is able to meet its financial obligations as they become due. In determining its capital allocation, the Corporation considers relevant regulatory capital requirements in order to effectively manage its capital markets business, the use of capital to develop the land and housing business in the real estate segment and resources required for the exploration, evaluation and development activities in the resource segment. The Corporation's capital management objectives also include ensuring that it has sufficient capital available to benefit from acquisitions and other opportunities, should they arise, and ensuring adequate returns for shareholders. The Corporation regularly assesses the allocation of its capital resources in response to changing economic conditions.

On an ongoing basis, the Corporation will require cash to support regulated subsidiaries, to develop real estate assets and resource properties, to meet the obligations under its other contractual commitments, and to finance dividend and interest payments on preference shares and debt obligations. The Corporation may also require cash to finance new business initiatives or to invest in other opportunities, including growth opportunities related to its portfolio of investments.

The real estate segment requires working capital to finance development of planned land and housing and condominium projects. The revolving term credit facility of $190 million in the real estate segment provides increased flexibility to operate this business efficiently. As well, Dundee Energy requires working capital to finance planned capital expenditures and development activities. Dundee Energy's demand revolving credit facility provides Dundee Energy with the necessary cash flow to undertake its planned work programs.

On a consolidated basis, the Corporation believes that operating cash flow, combined with available lines of credit and its portfolio of investments, provide sufficient cash resources for the Corporation to conduct its operations for the foreseeable future.

QUARTERLY SEGMENTED RESULTS OF OPERATIONS

Three months ended June 30, 2012 compared with the three months ended June 30, 2011

On a quarterly basis, consolidated net loss attributable to owners of the Corporation was $16.8 million representing a loss per share of approximately $0.34. This compares with net earnings attributable to owners of the Corporation of $21.0 million or $0.27 per share on a fully diluted basis in the same period of the prior year.

REAL ESTATE SEGMENT

Margins from Real Estate Operations

During the second quarter of 2012, real estate operations generated contribution margins of $28.5 million or 25.1% on revenues of $113.8 million. This compares with margins of $12.0 million or 19.5% on revenues of $61.6 million in the same quarter of 2011.

For the three months ended June 30,	2012				2011			
Components of Real Estate Operations*	Revenue	Costs	Margin	% Margin	Revenue	Costs	Margin	% Margin
Inventory								
Land under development	$ 56,016	$ 39,730	$ 16,286	29.1%	$ 24,210	$ 19,588	$ 4,622	19.1%
Housing	23,371	19,899	3,472	14.9%	23,582	19,318	4,264	18.1%
Condominiums	13,900	12,258	1,642	11.8%	2,793	3,882	(1,089)	(39.0%)
Investment properties	1,657	882	775	46.8%	1,461	610	851	58.2%
Income-producing properties	14,765	12,515	2,250	15.2%	8,129	6,144	1,985	24.4%
Other	4,104	-	4,104	N/A	1,377	-	1,377	N/A
	$ 113,813	$ 85,284	$ 28,529	25.1%	$ 61,552	$ 49,542	$ 12,010	19.5%

** Excludes general and administrative expenses, interest expense and depreciation*

Revenue from land sales in the second quarter of 2012 was $56.0 million generating contribution margins of $16.3 million or 29.1%. This compares with revenues of $24.2 million generating contribution margins of $4.6 million or 19.1% in the same quarter of 2011.

The increase resulted from a higher number of transactions, primarily in western Canada where Dundee Realty sold 408 lots at an average selling price of $117,000 per lot in the second quarter of 2012, compared to 229 lots at an average selling price of $116,000 per lot in the same period of 2011. In addition, Dundee Realty sold 17 parcel acres at an average price of $512,000 per acre in the current quarter compared to four parcel acres sold at $469,000 per acre in the same quarter of 2011.

Revenue from sales of housing units decreased marginally to $23.4 million in the second quarter of 2012, compared to $23.6 million in the same period in 2011. During this period, Dundee Realty sold 74 single-family homes in western Canada at an average price of $396,000 per home. The volume of sales compares favourably with 55 homes sold in the same quarter of the prior year. However, and consistent with year-over-year results, the average selling price of housing units in the second quarter of the prior year was substantially higher at $427,000 per unit, reflecting the sale of a single million dollar home. Decreases in housing revenues and contribution margins also reflect the previous completion of certain housing projects in Toronto. Second quarter results in the prior year included the sale of 45 homes in respect of these projects.

Due to first year sales related to Dundee Realty's Corktown Phase Two project and 2 Gladstone Avenue project, both located in Toronto, revenue from sales of condominium units increased by $11.1 million to $13.9 million in the second quarter of 2012.

Revenue and contribution margins from investment properties increased marginally in the second quarter of 2012 compared with operating results in the same quarter of the prior year. In addition to real estate revenue and contribution margins, changes in the fair values of investment properties during the second quarter of 2012 added a further $3.6 million (second quarter of 2011 – $0.9 million) to net earnings in the real estate segment.

In 2012, Dundee Realty acquired a 45% interest in a vacant office building in Toronto. The property was refurbished, leased and subsequently sold in the second quarter of 2012, contributing to an increase in revenue and contribution margins from income-producing properties. However, profitability from Dundee Realty's portfolio of income-producing properties was adversely affected by record low levels of snowfall, which had a material effect on revenue and contribution margins from Dundee Realty's ski operations in Colorado.

Equity Earnings in the Real Estate Segment

Equity earnings in the second quarter of 2012 include $2.3 million (second quarter of 2011 – $6.1 million) earned from the Corporation's ownership interest in Dundee REIT and earnings of $5.2 million (second quarter of 2011 – $nil) from the Corporation's ownership interest in Dundee International REIT. Equity losses in respect of 360 VOX were minimal in the second quarter of 2012.

RESOURCE SEGMENT

The resource segment generated net earnings of $1.9 million in the second quarter of 2012, compared with net earnings of $7.9 million in the same period of 2011. The decrease reflects both the effects of a reduction in the Corporation's share of earnings from its resource-based equity accounted investments to $3.3 million in the second quarter of 2012, compared with earnings of $7.7 million in the same period of 2011, as well as operating losses of $1.5 million (second quarter of 2011 – operating earnings of $0.2 million) relating to oil and gas production and sales activities.

Oil and Gas Revenue

For the three months ended June 30,			2012			2011
	Average Sales Volume/day	Revenue (net) ($000's)	Realized Prices* ($/unit)	Average Sales Volume/day	Revenue (net) ($000's)	Realized Prices* ($/unit)

Edmonton Par ($/bbl)			84.45			103.58
West Texas Intermediate (WTI) ($/bbl)			94.10			98.25

* Before royalty payments

During the second quarter of the current year, Dundee Energy earned net revenues of $7.5 million from oil and natural gas sales compared to $9.5 million in the same period of the prior year. The decrease is a result of declining commodity prices in the current quarter compared to the same quarter of the prior year.

Field Level Cash Flows and Field Netbacks

For the three months ended June 30,			2012			2011
	Natural Gas	Oil and Liquids	Total	Natural Gas	Oil and Liquids	Total
Total sales	$ 2,508	$ 6,385	$ 8,893	$ 4,541	$ 6,664	$ 11,205

Royalties	(0.40)	(13.46)	(5.96)	(0.72)	(15.15)	(7.43)
Production expenditures	(1.77)	(20.62)	(13.85)	(1.78)	(20.71)	(13.55)
Field netbacks	$ 1.67	$ 53.69	$ 24.00	$ 2.29	$ 63.15	$ 27.90

ASSET MANAGEMENT SEGMENT

The asset management segment generated a net loss of $30.3 million in the second quarter of 2012, compared with net earnings of $12.1 million in the same period of 2011. Included in the net loss for the second quarter of 2012 is a realized loss on investments of $34.0 million. This compares with a realized gain from investments of $1.9 million earned in the second quarter of the prior year.

Revenue from Asset Management Activities

Management fee revenues were $13.8 million in the second quarter of 2012 compared with $6.0 million in the same period of the prior year. Consistent with year-to-date results, the increase corresponds directly to an increase in AUM managed by DREAM.

For the three months ended June 30,	2012	2011
GIC		
Management fees	$ 834	$ 1,389
DREAM		
Management fees	10,988	2,891
Fees on invested capital	1,056	838
International operations	875	864
	$ 13,753	$ 5,982

CAPITAL MARKETS SEGMENT

During the second quarter of 2012, capital markets activities resulted in a pre-tax loss of $5.9 million compared with pre-tax earnings of $4.3 million earned in the second quarter of the prior year. Consistent with year-over-year results, the decline in net earnings reflects the challenging financial markets and business conditions that persisted throughout the latter part of 2011.

For the three months ended June 30,		2012		2011
Revenues				
Management fees	$	3,096	$	4,779
Financial services				
Investment banking		11,972		14,248
Commissions		8,804		10,250
Principal trading		(2,577)		(1,921)

Interest and dividends		2,305		2,483
		23,722		30,983
Cost of sales				
Variable compensation		(11,726)		(14,003)
Other items in net (loss) earnings attributable to the capital markets segment				
Depreciation		(168)		(193)
General and administrative		(17,560)		(12,441)
Interest expense		(96)		-
Foreign exchange loss		(65)		-
Net (loss) earnings attributable to the capital markets segment	$	(5,893)	$	4,346

Revenues in Dundee Capital Markets decreased to $23.7 million in the second quarter of 2012 from $31.0 million in the same period of the prior year. Investment banking revenues decreased by 16% relative to the second quarter of the prior year, primarily as a result of a decrease in new issue transactions during the second quarter of 2012. Commission revenues were $8.8 million in the three months ended June 30, 2012, compared to $10.3 million earned in the same period of the prior year.

During the second quarter of 2012, variable compensation expense was $11.7 million, compared with variable compensation expense of $14.0 million in the same period of the prior year. Variable compensation expense in the second quarter of the current year represented 59% of associated financial services revenue. In the second quarter of the prior year, variable compensation represented approximately 55% of financial services revenue. The increase in the rate of variable compensation reflects a change in the mix of financial services revenues generated during the period.

Management Fee Revenue

Management fee revenue earned from tax assisted investment products, closed-end funds, and financial advisor accounts was $3.1 million in the three months ended June 30, 2012. This compares with $4.8 million earned in the same period of the prior year. Consistent with year-to-date results, the decrease reflects a decline in AUM levels.

General and Administrative Expenses

General and administrative expenses in the capital markets segment were $17.6 million in the three months ended June 30, 2012, compared with $12.4 million in the same period of the prior year. Included in general and administrative expenses in the second quarter of the current year is $3.7 million of costs associated with the restructuring of the Calgary office in an effort to gain market share.

Discontinued operations	-	-	-	-	-	12.03	0.07	0.12
	$ -	$ 0.53	$ 0.47	$ 1.29	$ 0.27	$ 12.20	$ 1.16	$ 0.56

- Included in the net loss for the second quarter of 2012 is a $34.0 million realized loss in respect of certain of the Corporation's investments. Generally, investment gains or losses are only recorded in net earnings or loss when the Corporation disposes of an investment, or when there has been a permanent impairment in the carrying value of an investment. As a result, the Corporation may experience significant quarterly fluctuations in these amounts.
- Net earnings per share in the fourth quarter of 2011 and in subsequent quarters reflects the impact of the Corporation's substantial issuer bid pursuant to which it acquired 10 million Subordinate Shares of the Corporation for cancellation.
- Net earnings in the third quarter of 2011 include a pre-tax gain of $95.6 million from the Corporation's divestment of its interest in Breakwater.
- Net earnings in the first quarter of 2011 include a gain of $870.8 million from the Corporation's divestment of DundeeWealth.
- Performance fee revenue may be earned in each of the Corporation's capital markets and asset management segments. Performance fees are contingent on the market values of the underlying portfolio at a point in time, generally at the calendar year end, or upon the conclusion of limited partnership arrangements. As these performance fees are recorded in earnings only when these values have been determined with certainty, these operating segments may experience fluctuations in quarter-over-quarter revenues, with peaks generally in the fourth quarter of each year. Performance fees earned in the fourth quarter of 2011 were $nil (fourth quarter of 2010 – $32.7 million).
- Real estate operations are project driven. Real estate revenue and associated real estate operating costs are only included in operations in periods when a development project is completed and sold. Otherwise, these costs are deferred as real estate assets. This may cause fluctuations in net earnings from period to period.
- The Corporation's share of earnings from equity accounted investments is included in net earnings for each quarter. Earnings from each equity accounted investment and dilution gains and losses from these investments will fluctuate from period to period and may depend on market forces or other operating conditions that are not necessarily under the Corporation's direct control.

OFF-BALANCE SHEET ARRANGEMENTS, COMMITMENTS AND CONTINGENCIES

Other than as disclosed elsewhere in this MD&A or in Note 33 to the June 2012 Interim Consolidated Financial Statements, there have been no significant changes in the nature of off-balance sheet arrangements, commitments and contingencies from those described in Note 35 to the 2011 Audited Consolidated Financial Statements and under *"Off-Balance Sheet Arrangements"* and *"Commitments and Contingencies"* on pages 41 through 43 in the Corporation's MD&A as at and for the year ended December 31, 2011.

RELATED PARTY TRANSACTIONS

There have been no significant changes in the nature and scope of related party transactions to those described in Note 36 to the 2011 Audited Consolidated Financial Statements and the accompanying MD&A.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of the Corporation's consolidated financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and the related disclosure of contingent assets and liabilities. Critical accounting estimates represent estimates made by management that are, by their very nature, uncertain. The Corporation evaluates its estimates on an ongoing basis. Such estimates are based on historical experience and on various other assumptions that the Corporation believes are reasonable under the circumstances, and these estimates form the basis for making judgments about the carrying value of assets and liabilities and the reported amount of revenues and expenses that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

There have been no changes in the accounting policies applied in the preparation of the Corporation's June 2012 Interim Consolidated Financial Statements from those detailed in Note 3 to the Corporation's 2011 Audited Consolidated Financial Statements. A summary of the more significant judgments and estimates made by management in the preparation of its financial information is provided in Note 4 to the 2011 Audited Consolidated Financial Statements. There have been no significant changes in these judgments and estimates during the six months ended June 30, 2012.

CONTROLS AND PROCEDURES

In accordance with the Canadian Securities Administrators' National Instrument 52-109, the Corporation has filed certificates signed by its Chief Executive Officer and the Chief Financial Officer certifying that, among other things, the design of disclosure controls and procedures and the design of internal control over financial reporting are adequate as at June 30, 2012.

Disclosure controls and procedures are designed to ensure that information required to be disclosed by the Corporation in the reports it files or submits under securities legislation is recorded, processed, summarized and reported on a timely basis and that such information is accumulated and reported to management, including the Corporation's Chief Executive Officer and Chief Financial Officer, as appropriate, to allow required disclosures to be made in a timely fashion. Based on their evaluation, the Chief Executive Officer and Chief Financial Officer concluded that as of June 30, 2012, the Corporation's disclosure controls and procedures were effective.

The Chief Executive Officer and Chief Financial Officer of the Corporation have also evaluated whether there were changes to the Corporation's internal control over financial reporting during the six months ended June 30, 2012 that have materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting. There were no changes identified during their evaluation.

MANAGING RISK

Except as otherwise disclosed in this MD&A, there have been no significant changes to the nature and scope of the risks faced by the Corporation as described in the Corporation's 2011 Annual Information Form under "Risk Factors" which is available on SEDAR at *www.sedar.com*.

FORWARD LOOKING STATEMENTS

Dundee Corporation's public communications may include written or oral forward looking statements. Statements of this type are included in this MD&A, and may be included in other filings with the Canadian regulators, stock exchanges or in other

communications. All such statements constitute forward looking information within the meaning of securities law and are made pursuant to the "safe harbour" provisions of applicable securities laws. Forward looking statements may include, but are not limited to, statements about anticipated future events or results including comments with respect to the Corporation's objectives and priorities for 2012 and beyond, strategies or further actions with respect to the Corporation, its products and services, business operations, financial performance and condition. Forward looking statements are statements that are predictive in nature, depend upon or refer to future events or conditions or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or similar expressions concerning matters that are not historical facts. Such statements are based on current expectations of the Corporation's management and inherently involve numerous risks and uncertainties, known and unknown, including economic factors and those affecting the financial services, real estate and resource industries generally. The forward looking information contained in this MD&A is presented for the purpose of assisting shareholders in understanding business and strategic priorities and objectives as at the periods indicated and may not be appropriate for other purposes.

A number of risks, uncertainties and other factors may cause actual results to differ materially from the forward looking statements contained in this MD&A, including, among other factors, those referenced in the section entitled "Risk Factors" in the Corporation's Annual Information Form, which include, but are not limited to, general economic and market conditions; the Corporation's ability to execute strategic plans and meet financial obligations; the performance of the Corporation's principal subsidiaries; the Corporation's ability to raise additional capital; the Corporation's ability to create, attract and retain AUM and AUA; risks relating to trading activities and investments; competition faced by the Corporation; regulation of the Corporation's businesses; successful integration of the Corporation with acquired businesses and the realization of any anticipated synergies; risks associated with the Corporation's real estate and resource businesses and the Corporation's investment holdings in general, including risks associated with oil and gas and mining exploration, development and production activities, environmental risks, inflation, changes in interest rates, commodity prices and other financial exposures; the availability and adequacy of insurance coverage for the Corporation and its subsidiaries; maintenance of minimum regulatory capital requirements for certain of the Corporation's subsidiaries; potential liability of the Corporation and its subsidiaries under securities laws and for violations of investor suitability requirements; and the ability of the Corporation and its subsidiaries to attract and retain key personnel. The preceding list is not exhaustive of all possible risk factors that may influence actual results, and is compiled based upon information available as of August 9, 2012.

Forward looking statements contained in this MD&A are based upon assumptions about the future performance of the Canadian, United States, European and other foreign economies, which were material factors considered by management when setting Dundee Corporation's strategic priorities and objectives. In determining expectations for economic growth in the real estate, resource and capital markets sectors, the Corporation considered historical economic data provided by the Canadian government and its agencies, market and general economic conditions, which factors are unpredictable and may impact the Corporation's performance.

Forward looking statements contained in this MD&A are not guarantees of future performance and, while forward looking statements are based on certain assumptions that the Corporation considers reasonable, actual events and results could differ materially from those expressed or implied by forward looking statements made by the Corporation. Prospective investors are cautioned to consider these and other factors carefully when making decisions with respect to the Corporation and not place undue reliance on forward looking statements. Circumstances affecting the Corporation may change rapidly. Except as may be required by applicable law, the Corporation does not undertake any obligation to update publicly or revise any such forward looking statements, whether as a result of new information, future events or otherwise.

DUNDEE CORPORATION
NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

For the three and six months ended June 30, 2012 and June 30, 2011
Tabular dollar amounts in thousands of Canadian dollars, except per share amounts

1. NATURE OF OPERATIONS

Dundee Corporation (the "Corporation" or "Dundee Corporation") is an independent publicly traded Canadian asset management company. Dundee Corporation's asset management activities are focused in the areas of the Corporation's core competencies and include real estate and infrastructure as well as energy, resources and agriculture. Asset management activities are carried out by Goodman Investment Counsel Inc. ("GIC") (formerly Ned Goodman Investment Counsel Limited), a registered portfolio manager and exempt market dealer across Canada and an investment fund manager in the province of Ontario, and by Dundee Real Estate Asset Management ("DREAM"), the asset management division of Dundee Realty Corporation ("Dundee Realty"). Asset management activities are supported by the Corporation's ownership in Dundee Capital Markets Inc. ("Dundee Capital Markets"), which is also the asset manager of Dundee Corporation's flow-through limited partnership business carried out through the "CMP", "CDR" and "Canada Dominion Resources" brands.

Dundee Corporation also owns and manages direct investments in these core focus areas, through ownership of both publicly listed and private companies. Real estate operations are carried out through Dundee Realty, an owner, developer and manager of residential, commercial and recreational properties in North America and in Europe. Real estate operations are complemented by the Corporation's 24% interest in Dundee International Real Estate Investment Trust ("Dundee International REIT"), an unincorporated open-ended real estate development trust that invests in commercial real estate exclusively outside of Canada, as well as a 6% interest in Dundee Real Estate Investment Trust ("Dundee REIT"), a Canadian real estate investment trust.

Energy and resource operations include the Corporation's ownership in Dundee Energy Limited ("Dundee Energy"), an oil and natural gas company with a mandate to create long-term value through the development of high impact energy projects. The Corporation also holds several other investments in the resource sector for which it applies the equity method of accounting.

At June 30, 2012, the Corporation's major subsidiaries included:

	As at and for the six months ended June 30, 2012		As at and for the year ended December 31, 2011	
(in alphabetical order)	Opening Ownership	Ending Ownership	Opening Ownership	Ending Ownership
Blue Goose Capital Corporation (note 5)	81%	76%	-	81%
Dundee Capital Markets Inc. (note 6)	49%	100%	48%	49%
Dundee Energy Limited	57%	57%	54%	57%
Dundee Realty Corporation	70%	70%	70%	70%
DundeeWealth Inc. (note 4)	-	-	48%	-
Goodman Investment Counsel Inc.	100%	100%	100%	100%

The Corporation is incorporated under the Ontario Business Corporations Act and is domiciled in Canada. The Corporation's head office is located at Dundee Place, 1 Adelaide Street East, Toronto, Ontario, Canada, M5C 2V9. The Corporation is listed on the Toronto Stock Exchange ("TSX") under the symbol "DC.A".

2. BASIS OF PREPARATION

These unaudited condensed interim consolidated financial statements of the Corporation as at and for the three and six months ended June 30, 2012 ("June 2012 Interim Consolidated Financial Statements") have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), applicable to the preparation of interim financial statements, including International Accounting Standard ("IAS") 34, "*Interim Financial Reporting*". The June 2012 Interim Consolidated Financial Statements were authorized by the Board of Directors on August 9, 2012.

The June 2012 Interim Consolidated Financial Statements follow the same accounting principles and methods of application as those disclosed in note 3 to the Corporation's audited consolidated financial statements as at and for the year ended December 31, 2011 ("2011 Audited Consolidated Financial Statements"). The June 2012 Interim Consolidated Financial Statements do not include all disclosures required by IFRS for annual financial statements and accordingly, should be read in conjunction with the 2011 Audited Consolidated Financial Statements.

The preparation of the June 2012 Interim Consolidated Financial Statements requires management to make judgments in applying its accounting policies and estimates and assumptions about the future. These judgments, estimates and assumptions affect the Corporation's reported amounts of assets, liabilities, revenues and other items in earnings, and the related disclosure of contingent assets and liabilities, if any. The Corporation evaluates its estimates on an ongoing basis. Such estimates are based on historical experience and on various other assumptions that the Corporation believes are reasonable under the circumstances, and these estimates form the basis for making judgments about the carrying value of assets and liabilities and the reported amount of revenues and other items in earnings that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. There have been no significant changes in accounting judgments, estimates and assumptions made by the Corporation in the preparation of the June 2012 Interim Consolidated Financial Statements from those judgments, estimates and assumptions disclosed in note 4 to the 2011 Audited Consolidated Financial Statements.

3. ACCOUNTING STANDARDS, INTERPRETATIONS AND AMENDMENTS TO EXISTING STANDARDS NOT YET EFFECTIVE

On May 17, 2012, the IASB released "*Annual Improvements 2009 - 2011 Cycle*", as a series of amendments to IFRS, as its latest set of annual improvements. The Corporation has noted the following specific amendments included in the release which may impact the Corporation's financial statements:

Amendment to IAS 1, "*Presentation of Financial Statements*" ("IAS 1") – IAS 1 requires the presentation of an additional, opening statement of financial position when an entity applies an accounting policy retrospectively, or makes a retrospective restatement or reclassification. Amendments to IAS 1 clarify the disclosure requirements such that certain comparative information is only required if it has a material effect upon the information that is presented in the statement of financial position.

Amendment to IAS 16, "*Property, Plant & Equipment*" ("IAS 16") – IAS 16 was amended to provide further clarity on accounting for spare parts and servicing equipment. Before the amendment, IFRS required the classification of spare parts and servicing equipment as inventory. The amendment clarifies that these items should be classified as property, plant and equipment if they meet the definition pursuant to IAS 16.

Amendment to IAS 32, "*Financial Instruments: Presentation*" ("IAS 32") – IAS 32 was amended to clarify the treatment of income taxes relating to distributions and transaction costs.

Amendment to IAS 34, "*Interim Financial Reporting*" ("IAS 34") – IAS 34 was amended to align the disclosure requirements for segmented assets and segmented liabilities in interim financial reports with those of IFRS 8, "*Operating Segments*". Under the amendment, IAS 34 requires a measure of total assets and liabilities for an operating segment in interim financial statements if such information is regularly provided to the chief operating decision maker and there has been a material change in those measures since the last annual financial statements.

The above referenced amendments are effective for annual periods beginning on or after January 1, 2013, with early adoption permitted.

Other than as discussed above, new accounting standards, interpretations and amendments to existing standards that are not yet effective were outlined in note 3 to the 2011 Audited Consolidated Financial Statements.

The Corporation has not yet determined the impact, if any, that the new and amended standards may have on its financial statements.

4. DISCONTINUED OPERATIONS AND DIVESTMENT OF DUNDEEWEALTH INC.

On February 1, 2011, the Corporation sold its 48% interest in DundeeWealth Inc. ("DundeeWealth") to The Bank of Nova Scotia ("Scotiabank"), pursuant to an offer made by Scotiabank on November 22, 2010. In exchange, the Corporation received 18,599,028 common shares of Scotiabank (each a "Scotiabank Common Share") valued at $1,046,528,000 and 14,897,209 $25 3.70% 5-year rate reset preferred shares of Scotiabank (each a "Scotiabank Preferred Share") valued at $372,430,000. In addition, the Corporation received a cash dividend of $155,982,000 and a dividend-in-kind of 74,484,956 common shares of Dundee Capital Markets pursuant to distributions made by DundeeWealth immediately prior to completion of the transaction as described above. The Corporation realized a gain of $870,828,000 from the divestment of its investment in DundeeWealth.

The operating performance of DundeeWealth prior to completion of the transaction with Scotiabank has been included in the Corporation's consolidated statements of operations and comprehensive income for the comparative period ended June 30, 2011 as "*discontinued operations, net of taxes*" and was comprised of the following amounts:

		For the period from January 1, 2011 to February 1, 2011
Revenues	$	83,958
Other items in net loss		(93,971)
Net loss before income taxes		(10,013)
Income taxes		(9,987)
Net loss for the period	$	(20,000)
Net loss attributable to:		
Owners of the parent	$	(9,670)
Non-controlling interest		(10,330)
	$	(20,000)
Net loss for the period	$	(20,000)
Other comprehensive loss for the period, net of associated taxes of $3,061		(8,378)
Comprehensive loss for the period	$	(28,378)
Comprehensive loss attributable to:		
Owners of the parent	$	(13,676)
Non-controlling interest		(14,702)
	$	(28,378)

In connection with the transaction, each of the Corporation and Ned Goodman, the Corporation's President and Chief Executive Officer, entered into a non-competition and non-solicitation agreement with Scotiabank which, among other things, restricts each of them for a period of three years ending February 1, 2014, from competing directly or indirectly with the business of DundeeWealth acquired by Scotiabank.

5. BUSINESS COMBINATIONS

Acquisition of Blue Goose Capital Corporation

On December 9, 2011, the Corporation acquired a 79% interest in Blue Goose Capital Corporation ("Blue Goose") for cash of $12,000,000. Blue Goose is a privately-owned Canadian company operating in the organic and natural beef production market. Blue Goose has operations in both British Columbia and Ontario. During the three and six months ended June 30, 2012, Blue Goose generated revenues of $1,931,000 and $3,132,000. During the three months ended June 30, 2012, Blue Goose generated pre-tax earnings of $243,000, reducing its six months pre-tax loss to $473,000.

Acquisition of Dundee Securities Europe Ltd. (formerly "Middlemarch Partners Limited")

On November 11, 2011, the Corporation completed the acquisition of Dundee Securities Europe Ltd. ("DSE") for cash of $2,831,000 (£1,700,000). DSE is a securities firm licensed with the Financial Services Authority in the United Kingdom. During the three and six months ended June 30, 2012, DSE generated revenues of $54,000 and $985,000 respectively and it incurred a pre-tax comprehensive loss of $497,000 and $619,000 respectively.

Acquisition of Torque Energy Inc.

On August 4, 2011, Dundee Energy completed the acquisition of Torque Energy Inc. ("Torque"), a Canadian-based oil and natural gas company. On December 1, 2011, Dundee Energy converged the assets and operations acquired pursuant to the Torque transaction with its existing business in southern Ontario.

A summary of the allocation of the aggregate consideration transferred in the above referenced business combinations to the various identifiable assets and liabilities acquired, is summarized as follows:

	Blue Goose	*DSE*	*Torque*
Net assets acquired:			
Cash	$ 2,625	$ 2,050	$ -
Accounts receivable	-	151	1,171
Resource properties	-	-	10,076
Livestock	3,339	-	-
Capital assets	6,916	38	-
Other intangible assets	3,703	815	-
	16,583	3,054	11,247
Corporate debt	-	-	(1,429)
Accounts payable and accrued liabilities	(1,619)	(140)	(519)
Income taxes payable	-	(83)	-
Decommissioning liability	-	-	(2,169)
	$ 14,964	$ 2,831	$ 7,130
Aggregate consideration transferred:			
Cash	$ 12,000	$ 2,831	$ 6,012
Equity in Dundee Energy	-	-	1,118
Attributed to non-controlling interest	2,964	-	-
	$ 14,964	$ 2,831	$ 7,130

6. ACQUISITIONS AND DILUTIONS OF INTERESTS IN SUBSIDIARIES

Transactions Completed During the Six Months Ended June 30, 2012

		Effect on Contributed Surplus		
	Interest Owned 31-Dec-11	Increase/ Decrease in Ownership	Changes in Equity of Subsidiary	Interest Owned 30-Jun-12
Blue Goose Capital Corporation	81%	$ 204	$ -	76%
Dundee Capital Markets Inc.	49%	(4,977)	-	100%
Dundee Energy Limited	57%	-	148	57%
Dundee Realty Corporation	70%	-	(128)	70%
Nichromet Extraction Inc.	70%	(633)	-	72%

Blue Goose Capital Corporation

During the first half of 2012, the Corporation acquired 1,221,500 newly issued common shares of Blue Goose for $12,215,000. Concurrent with the Corporation's investment, Blue Goose issued shares to its non-controlling shareholders for cash and/or in consideration for asset acquisitions. On a net basis, the Corporation's investment in Blue Goose was diluted from 81% at December 31, 2011 to 76% at June 30, 2012 and accordingly, the Corporation recorded a dilution gain of $204,000 in contributed surplus.

Dundee Capital Markets Inc.

On February 1, 2012, the Corporation acquired all of Dundee Capital Markets' outstanding common shares held by non-controlling shareholders at a price of $1.125 per share by way of a court approved plan of arrangement under the Business Corporations Act (Ontario). The Corporation paid $88,033,000 in respect of the transaction. The difference between the consideration paid and the carrying value of the non-controlling interest of $83,056,000, aggregating $4,977,000, was recorded as a decrease in contributed surplus.

Nichromet Extraction Inc.

In March 2012, the Corporation acquired 2,000,000 common shares of Nichromet Extraction Inc. ("Nichromet") for $600,000 pursuant to a private transaction. In May 2012, the Corporation acquired a further 2,500,000 common shares of Nichromet from treasury at a cost of $500,000. The Corporation's interest in Nichromet was increased to 72% as a result of these transactions. The increase in the Corporation's interest in Nichromet resulted in a decrease to contributed surplus of $633,000.

Other Transactions

During the first half of 2012, the Corporation recognized a net dilution gain of $20,000 associated with changes in the equity of other subsidiaries. The dilution gain was recorded as an increase in contributed surplus.

Transactions Completed During the Six Months Ended June 30, 2011

		Effect on Contributed Surplus			
	Interest Owned 31-Dec-10	Increase/ Decrease in Ownership	Changes in Equity of Subsidiary	Gain on Divestment of Control	Interest Owned 30-Jun-11
Dundee Energy Limited	54%	$ (8)	$ 263	$ -	54%
DundeeWealth Inc. (note 4)	48%	-	-	870,828	n/a
Eurogas International Inc.	53%	4	1	-	53%
Nichromet Extraction Inc.	63%	(26)	-	-	67%

Nichromet Extraction Inc.

During the six months ended June 30, 2011, the Corporation acquired 14,250,000 newly issued common shares of Nichromet for $1,425,000. The acquisition increased the Corporation's ownership to approximately 67%. Approximately $26,000 of the acquisition was allocated to non-controlling shareholders of Nichromet, with a corresponding decrease in contributed surplus.

Other Transactions

During the first half of 2011, the Corporation recognized a dilution gain of $260,000 associated with changes in the equity of other subsidiaries. The dilution gain was recorded as an increase in contributed surplus.

Funds deposited into trust represent client funds deposited and held by Dundee Capital Markets in registered accounts. These funds have been deposited with a Canadian trust company. Included in *"Client deposits and related liabilities"* (note 18) is a corresponding liability related to these deposits.

As part of the separation of capital markets activities from DundeeWealth (note 4), Dundee Capital Markets entered into an introducing and carrying broker arrangement with Fidelity Clearing Canada ("FCC"). This arrangement became effective on January 1, 2012. "Amounts receivable from carrying broker" represents non-registered client balances and other corporate funds held by the carrying broker pursuant to this arrangement.

Dundee Capital Markets continues to have an introducing and carrying broker arrangement with a subsidiary of DundeeWealth to facilitate the transition of certain business processes following the divestment of DundeeWealth (note 4). This arrangement is expected to conclude during the second half of 2012.

8. DERIVATIVE FINANCIAL INSTRUMENTS

Risk Management Contracts

At June 30, 2012, Dundee Energy had entered into certain risk management contracts as identified in the table below. These derivative instruments are not designated in a qualifying hedge relationship and accordingly, are classified as financial instruments "at fair value through profit or loss" and are measured at fair value with changes in fair value recorded in net earnings in the period in which they occur.

Contract	Volume	Pricing Point	Strike Price CDN$/unit	Remaining Term
Fixed Price Swap - Crude oil	500 bbl/day	NYMEX	$101.20	July 01/12 to Dec 31/12
Fixed Price Swap - Natural Gas	7,000 mbtu/day	NYMEX	$3.84	July 01/12 to Dec 31/12

The Corporation has determined that the fair value of risk management contracts at June 30, 2012 resulted in an asset balance of $2,514,000 (December 31, 2011 – asset balance of $1,616,000). During the three and six months ended June 30, 2012, the Corporation recognized a gain of $1,507,000 and $2,767,000 respectively (three and six months ended June 30, 2011 – gain of $1,939,000 and $548,000 respectively) from changes in the fair value of risk management contracts.

The forecasted market prices of commodities that were used to determine the fair value of risk management contracts reflect management's best estimate at the measurement date and considers various factors. However, future market prices for

commodities will vary from those used in recording the fair value of the related risk management contracts and it is possible that these variations could be material, causing volatility in the Corporation's financial results.

Embedded Derivative

The Corporation has determined that the redemption option feature of the Corporation's Preference Shares, series 1 (note 21) meets the definition of an embedded derivative, as the economic risks and characteristics of the redemption option are not closely related to that of the Preference Shares, series 1. Accordingly, the embedded redemption option has been bifurcated from the Preference Shares, series 1 and has been recognized in the consolidated financial statements as a derivative financial instrument. The Corporation has determined that at June 30, 2012, the fair value of the embedded redemption option was $4,020,000 (December 31, 2011 – $4,440,000). During the three months ended June 30, 2012, the Corporation recognized a gain from changes in the fair value of these derivative financial instruments of $122,000 (three months ended June 30, 2011 – gain of $1,560,000), reducing the loss incurred during the six months ended June 30, 2012 to $418,000 (six months ended June 30, 2011 – gain of $756,000).

9. BROKERAGE SECURITIES OWNED AND BROKERAGE SECURITIES SOLD SHORT

As at	June 30, 2012		December 31, 2011	
	Securities Owned	Securities Sold Short	Securities Owned	Securities Sold Short
Bonds	$ 16,073	$ 12,729	$ 18,092	$ 12,654
Equities	85,075	354	17,605	1,545
Other	895	-	1,903	-
	$ 102,043	**$ 13,083**	**$ 37,600**	**$ 14,199**

Bond maturities range from 2012 to 2041 (December 31, 2011 – from 2012 to 2111) and have annual interest yields ranging from 0% to 12% (December 31, 2011 – 0% to 12%).

From time to time, Dundee Capital Markets may sell securities that it does not own and will therefore be obligated to purchase such securities at a future date to settle its obligation. These securities have been designated as "*Securities sold short*" in these consolidated financial statements. Dundee Capital Markets may incur a loss if the market value of these securities subsequently increases.

10. INVESTMENTS

As at	June 30, 2012		December 31, 2011	
	Cost	Fair Value	Cost	Fair Value
Publicly traded securities	$ 1,097,251	$ 1,035,105	$ 1,334,785	$ 1,258,259
Private investments	169,227	164,915	125,168	133,563
Mutual funds and other short term investments	5,782	5,958	5,782	5,785
Debt securities	148,948	148,274	89,612	87,362
	$ 1,421,208	**$ 1,354,252**	**$ 1,555,347**	**$ 1,484,969**

Amounts in "Publicly traded securities" include the Corporation's interest in the Scotiabank Common Shares and the Scotiabank Preferred Shares, which the Corporation received in settlement of the Corporation's divestment of its interest in DundeeWealth (note 4). During the first half of 2012, the Corporation sold certain Scotiabank Common Shares and Scotiabank Preferred Shares for aggregate proceeds of $264,729,000. At June 30, 2012, the Corporation's remaining investment in Scotiabank Common Shares and Scotiabank Preferred Shares had a cost of $886,079,000 and a fair value of $834,057,000.

The Corporation recognizes changes in fair values of available-for-sale ("AFS") securities, other than changes that are determined to be impairments in fair value, in other comprehensive income ("OCI"). During the six months ended June 30, 2012, the Corporation recognized a gain in OCI, net of taxes, of $9,221,000 (six months ended June 30, 2011 – gain, net of taxes, of $39,899,000) in respect of its portfolio of AFS securities, net of a loss incurred in the three months ended June 30, 2012 of $94,963,000 (three months ended June 30, 2011 – loss of $48,917,000). Amounts of unrealized gains transferred to net earnings in the three and six months ended June 30, 2012 are net of recognized impairments in fair value of $12,334,000 and $20,401,000 respectively (three and six months ended June 30, 2011 – $nil).

11. EQUITY ACCOUNTED INVESTMENTS

-	Escal UGS S.L.	33%	-	33%	-
			$ 456,162		**$ 429,176**

The aggregate fair value of the Corporation's equity accounted investments, as outlined above, was $544,802,000 at June 30, 2012 (December 31, 2011 – $569,048,000).

Significant Transactions Affecting the Carrying Value of Equity Accounted Investments during the six months ended June 30, 2012

Dundee Real Estate Investment Trust

During the first quarter of 2012, Dundee REIT issued 12,580,347 units for the acquisition of Whiterock Real Estate Investment Trust, representing aggregate equity consideration of $434,800,000. In addition, Dundee REIT issued a further 6,555,000 units pursuant to a public offering for gross proceeds of $231,719,000. The Corporation purchased 364,800 Dundee REIT units pursuant to the public offering at a cost of $12,896,000. On a combined basis, these transactions diluted the Corporation's ownership interest in Dundee REIT from 8% at the end of the prior year to 6% at June 30, 2012.

On June 12, 2012, Dundee REIT issued an additional 10,392,550 units pursuant to a public offering, generating gross proceeds of approximately $373,100,000. The net proceeds from the offering were used to partially fund the acquisition of Scotia Plaza, in downtown Toronto. The Corporation purchased 390,000 units pursuant to the public offering at a cost of $14,000,000, allowing it to maintain its ownership interest at 6%.

The Corporation continues to account for its investment in Dundee REIT on an equity basis as it is able to exert significant influence over the operations and financial results of Dundee REIT through its representation on the board of trustees of Dundee REIT, through services arrangements and through senior management representation.

Dundee International Real Estate Investment Trust

On April 17, 2012, Dundee International REIT completed the issuance of 4,600,000 units pursuant to a bought deal financing, generating proceeds of $46,460,000. The issuance of these units diluted the Corporation's ownership interest in Dundee International REIT from 29% at the end of the prior year to 24% at June 30, 2012.

Escal UGS S.L. ("Escal")

During the six months ended June 30, 2012, Escal issued 39 par value shares for €2,000 (year ended December 31, 2011 – 99 par value shares for €5,000). To maintain its proportionate interest in Escal, the Corporation's subsidiary acquired 13 of the newly issued shares (year ended December 31, 2011 – 33) for a nominal amount (year ended December 31, 2011 – $3,000; €2,000). In addition and in order to comply with minimum equity to debt ratio requirements, the majority shareholder in Escal also contributed an issuance premium on the newly issued shares of €5,774,000 (year ended December 31, 2011 – €14,659,000) and it issued €15,400,000 (year ended December 31, 2011 – €43,300,000) in subordinated loans. The Corporation's subsidiary has not recognized the benefit of its 33% interest in the issuance premium and subordinated loans as the ultimate realization and measurement of the benefit is subject to a significant number of risks and uncertainties, including but not limited to, execution risk associated with the construction of the project, the availability and terms of future financing arrangements and the 50-year life span of the project.

Escal has established a hedging strategy to mitigate its exposure to interest rate risk associated with its project financing agreement. At June 30, 2012, the fair value of Escal's obligations in respect of these hedging strategies was approximately €72,762,000 (year ended December 31, 2011 – €74,790,000). Recognition of these losses draws the Corporation's carrying value in Escal to zero. At June 30, 2012, the Corporation had not recorded a liability of $25,576,000 (year ended December 31, 2011 – $27,108,000) related to additional losses incurred by Escal, as it does not have the legal or constructive obligation in respect thereof.

Significant Transactions Affecting the Carrying Value of Equity Accounted Investments during the six months ended June 30, 2011

Dundee Real Estate Investment Trust

During the first half of the prior year, Dundee REIT completed a public offering of 10,108,000 units for gross proceeds of $345,641,000. The Corporation purchased 356,000 units pursuant to these offerings, resulting in a dilution of the Corporation's interest from 9% at the end of December 2010 to 8% at June 30, 2011.

Ryan Gold Corp. ("Ryan Gold")

On May 12, 2011, Ryan Gold announced that it had closed a bought deal financing of 15,000,000 units at a price of $2.00 per unit and 9,900,000 flow-through shares at a price of $2.25 per share for gross proceeds of $52,300,000. Dundee Corporation purchased 4,400,000 flow-through shares for $10,000,000 pursuant to the offering. As a result of this participation, the Corporation maintained its ownership interest of 12% in Ryan Gold.

Share of Earnings from Equity Accounted Investments

During the three and six months ended June 30, 2012, the Corporation's share of earnings from equity accounted investments, including its share of earnings from real estate joint venture investments (note 12), was $11,737,000 and $22,367,000 respectively (three and six months ended June 30, 2011 – $14,072,000 and $29,332,000 respectively).

	For the three months ended		For the six months ended

12. REAL ESTATE JOINT VENTURE INVESTMENTS

Dundee Realty has entered into certain real estate joint venture arrangements, primarily for the development of investment and recreational properties and for renewable energy project management. These arrangements are accounted for on an equity basis. At June 30, 2012, the carrying value of these joint venture investments was $54,765,000 (December 31, 2011 – $47,917,000). During the three and six months ended June 30, 2012, Dundee Realty's share of earnings from these arrangements was $831,000 and $900,000 respectively (three and six months ended June 30, 2011 – $202,000 and $462,000 respectively).

17. BANK INDEBTEDNESS

From time to time, Dundee Capital Markets may utilize call loan arrangements to facilitate the securities settlement process for both client and principal securities transactions, or to fund margin lending. In connection with the establishment of an introducing and carrying broker arrangement with a third-party service provider on January 1, 2012, Dundee Capital Markets arranged for an uncommitted call loan facility for up to $75 million. At June 30, 2012, December 31, 2011 and June 30, 2011, there were no amounts drawn pursuant to call loan facilities available to the brokerage subsidiary.

Interest rates on amounts drawn during the first half of 2012 were 1.5% on Canadian dollar denominated borrowings and ranged from 0.5% to 1.0% on borrowings denominated in U.S. dollars.

18. CLIENT DEPOSITS AND RELATED LIABILITIES

As at		June 30, 2012		December 31, 2011

$225,000,000 Revolving Term Credit Facility

On October 21, 2011, the Corporation established a $225 million revolving term credit facility with a Canadian Schedule I Chartered Bank which matures on November 11, 2012. Borrowings under the credit facility bear interest at a rate per annum equal to the bank's prime lending rate for loans plus 0.75% or, at the Corporation's option, at the prevailing bankers' acceptance or London Inter-Bank Offer Rate plus 1.75%. Unused amounts available under the facility are subject to an annual standby fee of 0.39375%.

Draws against the revolving term credit facility are contingent on, among other things, the pledge of certain of the Corporation's investments. The facility is subject to certain other covenants, including the maintenance of certain financial ratios and restrictions on the existence of other secured indebtedness, restrictions on the redemption, purchase or repayment of the Corporation's outstanding exchangeable debentures (see below), and restrictions on the prepayment and payment of interest on these exchangeable debentures.

At June 30, 2012, the Corporation had drawn $224,304,000 against this facility. During the three and six months ended June 30, 2012, interest expense relating to the Corporation's revolving term credit facility, including standby fees and other similar costs, was $2,045,000 and $4,108,000 respectively (three and six months ended June 30, 2011 – $660,000 and $937,000 respectively).

$25,000,000 Fixed Term Credit Facility

In connection with the establishment of the Corporation's $225 million revolving term credit facility in October 2011, the Corporation also arranged for a $100 million fixed term credit facility as a "bulge" amount to the $225 million revolving term credit facility. The fixed term credit facility was originally established to facilitate the Corporation's substantial issuer bid completed in October 2011 (note 22). During the second quarter of 2012, amounts borrowed pursuant to these arrangements were repaid and the credit facility was extinguished. During the three and six months ended June 30, 2012, interest expense relating to the fixed term credit facility was $124,000 and $509,000 respectively.

$7,902,000, 5.85% Exchangeable Unsecured Subordinated Debentures

At June 30, 2012, the Corporation had 7,902 outstanding exchangeable unsecured subordinated debentures with a par value per debenture of $1,000. The exchangeable debentures mature on June 30, 2015 and bear interest at 5.85% per annum, payable semi-annually on June 30 and December 31 of each year. Each exchangeable debenture may be exchanged, at the option of the holder for 33.6134 units of Dundee REIT, representing a conversion price of $29.75 per Dundee REIT unit.

During the six months ended June 30, 2012, an aggregate of $1,280,000 of exchangeable debentures were surrendered for exchange and the Corporation delivered 43,020 units of Dundee REIT in settlement thereof.

The carrying value of the exchangeable debentures is adjusted in the Corporation's consolidated financial statements to reflect the fair value of the embedded exchange feature, provided that such adjustment does not result in a carrying value that is below the principal value of the exchangeable debentures outstanding. The fair value of the exchange feature is determined using a valuation model that recognizes both the debt and exchange feature of the debentures and is based on the premise that each of these components have different default risks. Changes in the fair value of the exchange feature are recorded in net earnings. Based on this valuation model, the Corporation determined that the value of the exchangeable debentures at June 30, 2012 was $10,125,000.

$80,000,000 Demand Revolving Credit Facility, Dundee Energy Limited

Dundee Energy Limited Partnership ("DELP"), a subsidiary of Dundee Energy, has established an $80 million credit facility with a syndicate comprised of certain Canadian chartered banks. The credit facility provides the subsidiary with a revolving demand loan, subject to a tiered interest rate structure based on its net debt to cash flow ratio, as defined in the credit facility. Based on current ratios, draws on the credit facility bear interest, at the option of the subsidiary, at either the bank's prime lending rate plus 3.0% for loans or letters of credit, or, for bankers' acceptances, at the bank's then prevailing bankers' acceptance rate plus 4.0%. DELP is also subject to a standby fee of 0.55% on unused amounts under the credit facility. During the three and six months ended June 30, 2012, interest expense relating to Dundee Energy's credit facility, including standby fees and other similar costs, was $842,000 and $1,673,000 respectively (three and six months ended June 30, 2011 – $1,037,000 and $1,862,000 respectively). At June 30, 2012, DELP had drawn $63,370,000 pursuant to the credit facility, including a letter of credit for $3,270,000.

The credit facility is secured against all of the oil and natural gas properties owned by DELP. In addition, Dundee Energy has assigned a limited recourse guarantee of its units in the subsidiary as further security pursuant to the credit facility. The credit facility is subject to certain covenants, including maintenance of minimum levels of working capital. At June 30, 2012, Dundee Energy was in compliance with all such covenants.

Subsequent to June 30, 2012, DELP's credit facility was amended to reduce amounts available pursuant to the credit facility from $80 million to $70 million. There were no other material changes to the terms of the credit facility as a result of the amendment.

$10,000,000 Revolving Term Credit Facility, Blue Goose Capital Corporation

In April 2012, Blue Goose entered into a $10 million credit facility with a Canadian financial institution and leading lender to the agriculture industry. Amounts borrowed pursuant to the credit facility are subject to variable interest rates with a weighted average rate of 4.2% at June 30, 2012. The credit facility matures on June 1, 2017. The credit is secured by a first charge mortgage against various real estate assets held by Blue Goose. At June 30, 2012, Blue Goose had drawn $8,793,000 pursuant to the credit arrangement. Interest expense relating to this credit facility since it was established in April 2012, was $49,000.

$190,000,000 Revolving Term Credit Facility, Dundee Realty Corporation

Dundee Realty has established a revolving term credit facility available up to a formula based maximum not to exceed $190 million with a Canadian Schedule I Chartered Bank. The facility bears interest, at Dundee Realty's option, at a rate per annum equal to either the bank's prime lending rate plus 1.25%, or at the bank's then prevailing bankers' acceptance rate

plus 2.50%. The facility was renewed on February 1, 2012 and expires on November 30, 2013, except for $40 million which matures and must be repaid on September 15, 2012, reducing the facility amount to $150,000,000. The facility is secured by a general security agreement and a first charge against various real estate assets in western Canada. Interest expense relating to this revolving term credit facility during the three and six months ended June 30, 2012 was $830,000 and $1,960,000 respectively (three and six months ended June 30, 2011 – $990,000 and $2,126,000 respectively).

At June 30, 2012, Dundee Realty had drawn $73,000,000 against this facility and it had issued letters of credit of $82,290,000.

Other Real Estate Debt

Other real estate debt is secured by charges on specific properties to which the debt relates. Mortgages, including land mortgages, are secured by charges on specific properties. Housing advances are secured by charges on specific land under development, housing and condominiums under development, or land held for development. Term debt is secured by charges on specific capital equipment. At June 30, 2012, the weighted average interest rate on fixed rate debt at Dundee Realty, aggregating $32,522,000, was 7.09%. The remaining real estate debt, including Dundee Realty's demand revolving term credit facilities, is subject to variable interest rates with a weighted average rate at June 30, 2012 of 4.02%. Fixed rate debt matures between 2012 and 2016. Variable rate debt, including the revolving term credit facility, matures between 2012 and 2018.

During the three and six months ended June 30, 2012, Dundee Realty capitalized interest of $885,000 and $1,576,000 respectively (three and six months ended June 30, 2011 – $739,000 and $1,152,000 respectively), including interest incurred on its revolving term credit facility and on other real estate debt, to the carrying value of certain real estate assets.

20. DECOMMISSIONING LIABILITIES

The carrying value of the Corporation's decommissioning liabilities is comprised of the expected future abandonment and site restoration costs associated with resource properties. The Corporation has estimated its abandonment and reclamation costs based on the Corporation's net ownership in these assets, the estimated cost to abandon and reclaim these properties, including the associated facilities, and the estimated timing of the costs to be incurred in future periods.

	As at and for the six months ended June 30, 2012	As at and for the year ended December 31, 2011
Undiscounted future obligations, beginning of period	$ 84,686	$ 81,578
Acquisition (note 5)	-	4,621
Effect of changes in estimates	134	(63)
Liabilities settled (reclamation expenditures)	(1,762)	(1,450)
Undiscounted future obligations, end of period	$ 83,058	$ 84,686

Changes in estimates recognized during the six months ended June 30, 2012 reflect the impact of inflation to the timing of abandonment and restoration costs related to certain land and buildings used in production.

The following table reconciles the Corporation's decommissioning liabilities on a discounted basis.

	As at and for the six months ended June 30, 2012	As at and for the year ended December 31, 2011
Discount rates applied to future obligations	*1.00% - 2.24%*	*0.95% - 2.42%*
Inflation rate	*2.00%*	*2.00%*
Discounted future obligations, beginning of period	$ 45,234	$ 33,391
Acquisition (note 5)	-	2,169
Effect of changes in estimates and remeasurement of discount and foreign exchange rates	2,040	10,076
Liabilities settled (reclamation expenditures)	(1,762)	(1,450)
Accretion	483	1,048
Discounted future obligations, end of period	$ 45,995	$ 45,234

21. PREFERENCE SHARES

The terms of the Corporation's preference shares are summarized in note 23 to the Corporation's 2011 Audited Consolidated Financial Statements.

Issued and Outstanding First Preference Shares, Series 1 ("Preference Shares, series 1")

	Number of Shares	Par Value	Issue Costs	Premium	Carrying Value
Balance as at December 31, 2010	6,000,000	$ 150,000	$ (2,608)	$ 680	$ 148,072
Amortization for the six months ended June 30, 2011	-	-	237	(62)	175
Balance as at June 30, 2011	6,000,000	150,000	(2,371)	618	148,247
Amortization for the period from July 1, 2011 to December 31, 2011	-	-	237	(61)	176
Balance as at December 31, 2011	6,000,000	150,000	(2,134)	557	148,423
Amortization for the six months ended June 30, 2012	-	-	237	(62)	175
Balance as at June 30, 2012	6,000,000	$ 150,000	$ (1,897)	$ 495	$ 148,598

Issued and Outstanding First Preference Shares, Series 2 ("Preference Shares, series 2")

	Number of Shares	Par Value	Issue Costs	Carrying Value
Balance as at June 30, 2012 and December 31, 2011	5,200,000	$ 130,000	$ (2,932)	$ 127,068

22. SHARE CAPITAL

The terms of the Corporation's Class A subordinate voting shares ("Subordinate Shares") and Class B common shares ("Class B Shares"), and significant transactions in respect thereof during the year ended December 31, 2011, are summarized in note 24 to the Corporation's 2011 Audited Consolidated Financial Statements.

Issued and Outstanding

	SUBORDINATE SHARES		CLASS B SHARES		TOTAL	
	Number	Amount	Number	Amount	Number	Amount

Normal Course Issuer Bid

On March 29, 2012, the Corporation announced that it had received regulatory approval for the renewal of its normal course issuer bid from April 1, 2012 to March 31, 2013. Subject to certain conditions, the Corporation may purchase up to a maximum of 2,789,554 Subordinate Shares pursuant to these arrangements, representing approximately 10% of its public float at the time approval for the normal course issuer bid was granted.

The Corporation did not repurchase any Subordinate Shares for cancellation during the first half of 2012.

Share Purchase Plan

As part of its share incentive arrangements, the Corporation established a share purchase plan pursuant to which eligible participants may contribute up to a specified maximum amount of their basic annual salary towards the purchase of Subordinate Shares of the Corporation, either from treasury or in the open market, at the discretion of the Corporation. Compensation expense associated with the share purchase plan during the three and six months ended June 30, 2012 was $158,000 and $303,000 respectively (three and six months ended June 30, 2011 – $129,000 and $259,000 respectively).

During the six months ended June 30, 2012, the Corporation issued 2,949 Subordinate Shares for $70,000 (six months ended June 30, 2011 – 2,975 Subordinate Shares for $70,000) from treasury pursuant to the share purchase plan, with the balance of the amounts contributed to the share purchase plan being used to purchase shares in the open market.

23. ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

	Net unrealized (loss) gains, net of taxes

27. SHARE INCENTIVE PLAN ARRANGEMENTS

The terms of the Corporation's share based compensation plans are summarized in note 29 to the Corporation's 2011 Audited Consolidated Financial Statements.

Share Based Compensation

During the three and six months ended June 30, 2012, the Corporation recognized share based compensation expense of $641,000 and $1,197,000 respectively (three and six months ended June 30, 2011 – $567,000 and $1,108,000 respectively) related to share incentive arrangements, before similar arrangements of its subsidiaries, as described in the following table.

	For the three months ended		For the six months ended	
	June 30, 2012	June 30, 2011	June 30, 2012	June 30, 2011
Share option plan	$ 260	$ 263	$ 535	$ 523
Deferred share unit plan	381	304	662	585
	$ 641	**$ 567**	**$ 1,197**	**$ 1,108**

Share Option Plan

There were no share option awards granted in the first half of 2012 and the year ended December 31, 2011. A summary of the status of the Corporation's share option plan as at June 30, 2012 and December 31, 2011, and the changes during the six months and the year then ended, is as follows:

	Six months ended June 30, 2012		Year ended December 31, 2011	
	Number of Options	Weighted Average Exercise Price	Number of Options	Weighted Average Exercise Price
Outstanding, beginning of period	1,402,000	$9.09	1,533,000	$8.72
Exercised	(112,000)	$5.41	(131,000)	$4.80
Outstanding, end of period	**1,290,000**	**$9.40**	**1,402,000**	**$9.09**
Exercisable options	501,000	$9.40	613,000	$8.67

Exercise Price	Options Outstanding	Weighted Average Remaining Contractual Life (Years)	Options Exercisable
Options issued with an exercise price of $9.40	1,270,000	2.62	496,000
Options issued with an exercise price of $9.67	20,000	2.62	5,000

Deferred Share Unit Plan

During the six months ended June 30, 2012, the Corporation issued 132,847 (six months ended June 30, 2011 – 23,371) deferred share units ("DSUs") to certain employees and directors of the Corporation, each DSU entitling the holder thereof to a Subordinate Share on retirement. At June 30, 2012, there were 1,249,196 (December 31, 2011 – 1,116,349) DSUs outstanding.

Share Incentive Plan of Dundee Energy

Dundee Energy has established a share incentive plan for its directors, officers and employees. As at June 30, 2012, Dundee Energy had 3,815,000 share options outstanding (December 31, 2011 – 5,665,000) at a weighted average exercise price of $0.77 (December 31, 2011 – $0.92), of which 2,476,664 share options were exercisable at June 30, 2012 (December 31, 2011 – 4,593,332). Dundee Energy also has a deferred share unit plan pursuant to which, at June 30, 2012, there were 745,463 (December 31, 2011 – 603,830) DSUs outstanding.

During the three and six months ended June 30, 2012, compensation expense of $160,000 and $266,000 respectively (three and six months ended June 30, 2011 – $242,000 and $483,000 respectively) was recognized in respect of Dundee Energy's share option and deferred share unit arrangements.

Share Based Compensation of Other Subsidiaries

From time to time, other subsidiaries of the Corporation may incur share based compensation expense pursuant to their respective share incentive plan arrangements. During the three and six months ended June 30, 2012, other subsidiaries recognized share based compensation of $65,000 and $238,000 respectively (three and six months ended June 30, 2011 – $1,000 and $3,000 respectively).

28. GENERAL AND ADMINISTRATIVE EXPENSES BY NATURE

	For the three months ended		For the six months ended	
	June 30, 2012	June 30, 2011	June 30, 2012	June 30, 2011
Salary and salary-related	$ 21,614	$ 15,985	$ 38,528	$ 46,460
Corporate and professional fees	7,673	6,404	15,632	12,935
General office	10,223	6,658	18,086	13,438
Capitalized expenditures	(3,274)	(3,890)	(6,498)	(6,796)
Expense recoveries	(572)	(620)	(1,017)	(1,103)
Other	530	3,455	3,021	4,640
	$ 36,194	$ 27,992	$ 67,752	$ 69,574

29. INCOME TAXES

During the three and six months ended June 30, 2012, the Corporation recognized an income tax expense amount on earnings from continuing operations of $10,664,000 and $25,575,000 respectively (three and six months ended June 30, 2011 – $12,999,000 and $18,021,000 respectively). The major components of income tax expense include the following items:

	For the three months ended		For the six months ended	
	June 30, 2012	June 30, 2011	June 30, 2012	June 30, 2011
Current income taxes	$ 10,183	$ 3,287	$ 15,151	$ 15,189
Deferred income taxes	481	9,712	10,424	2,832
Total income taxes	**$ 10,664**	**$ 12,999**	**$ 25,575**	**$ 18,021**

The income tax expense amount on pre-tax earnings from continuing operations differs from the income tax expense amount that would arise using the combined Canadian federal and provincial statutory tax rate of 26% (June 30, 2011 – 28%), as a result of the following items:

	For the three months ended		For the six months ended	
	June 30, 2012	June 30, 2011	June 30, 2012	June 30, 2011
Earnings before tax at statutory rate of 26% (June 30, 2011 – 28%)	$ 705	$ 10,545	$ 13,949	$ 16,959
Effect on taxes of:				
Non-deductible expenses	3,244	655	5,370	1,995
Non-taxable revenue	(2,451)	(4,598)	(6,021)	(8,849)
Change in substantively enacted income tax rates	6,811	-	6,811	-
Remeasurement of deferred income taxes	537	(83)	223	(588)
Net income tax not previously recognized	96	4,014	108	2,700
Net Part IV tax, net of dividend refund of $1,356 and $2,713 (June 30, 2011 – $1,356 and $2,713)	1,598	3,017	3,953	5,955
Change in unrecognized temporary differences	430	163	1,170	388
Other differences	(306)	(714)	12	(539)
Income tax expense	**$ 10,664**	**$ 12,999**	**$ 25,575**	**$ 18,021**

Significant components of the Corporation's deferred income tax assets and liabilities are as follows:

As at	June 30, 2012	December 31, 2011
Deferred income tax assets		
Loss carry forwards	$ 10,874	$ 17,033
Capital and other assets	841	1,667
Non-deductible reserves	925	847
Accrued liabilities	5,948	1,778
Other	9,248	9,819
Total deferred income tax assets	27,836	31,144
Deferred income tax liabilities		
Investments including equity accounted investments	(133,158)	(144,055)
Real estate assets	(47,040)	(39,068)
Other	(20,457)	(18,759)
Total deferred income tax liabilities	(200,655)	(201,882)
Net deferred income tax liabilities	**$ (172,819)**	**$ (170,738)**

A deferred income tax asset is only recognized when management believes it is more likely than not that the benefit will be recognized.

At June 30, 2012, the Corporation had operating loss carry forwards of $46,632,000 (December 31, 2011 – $69,343,000). Operating loss carry forwards by year of expiry are summarized below.

Year of Expiry:	**Recognized**	**Unrecognized**	**Total**
2014	$ -	$ 12	$ 12
2015	-	40	40
Thereafter	36,083	10,450	46,533
	36,083	10,502	46,585
Taxable capital loss	47	-	47
	$ 36,130	$ 10,502	$ 46,632

31. FINANCIAL INSTRUMENTS

A detailed description of the Corporation's financial assets and financial liabilities and its associated risk management in respect thereof are provided in note 33 to the Corporation's 2011 Audited Consolidated Financial Statements. There have been no significant changes in the business and economic circumstances and the related financial risks that affect the fair value of the Corporation's financial assets and financial liabilities since December 31, 2011.

32. CAPITAL MANAGEMENT

The Corporation defines the capital that it manages as the aggregate of its shareholders' equity and interest bearing debt, including outstanding preference shares. The following table summarizes the carrying value of the Corporation's capital as at June 30, 2012 and December 31, 2011.

As at	June 30, 2012	December 31, 2011
Shareholders' equity	$ 1,818,813	$ 1,807,272
Corporate debt	508,343	546,597
Preference Shares, series 1	148,598	148,423
	$ 2,475,754	**$ 2,502,292**

The Corporation's objectives when managing capital include (i) ensuring that the Corporation and all of its regulated entities meet relevant regulatory capital requirements; (ii) ensuring that the Corporation is able to meet its financial obligations as they become due, whilst ensuring compliance with all applicable debt covenants; (iii) ensuring that the Corporation has sufficient capital to manage business activities in each of its operating segments; (iv) ensuring that the Corporation has sufficient capital available to benefit from acquisition opportunities, should they arise; and (v) ensuring adequate returns for shareholders. The Corporation regularly assesses its capital management practices in response to changing economic conditions.

Certain subsidiaries of the Corporation are subject to regulatory capital requirements. Compliance with these requirements requires that the subsidiaries maintain sufficient cash and other liquid assets on hand to maintain regulatory capital requirements, rather than using these liquid assets in connection with business activities or otherwise. As at June 30, 2012 and December 31, 2011, the Corporation and its subsidiaries complied with all regulatory capital requirements and all debt covenants.

33. COMMITMENTS, CONTINGENCIES AND OFF-BALANCE SHEET ARRANGEMENTS

A description of the Corporation's commitments, contingencies and off-balance sheet arrangements is provided in note 35 to the Corporation's 2011 Audited Consolidated Financial Statements. The following provides a summary of material changes to these items as at June 30, 2012.

Land Purchase Agreements and Estimated Costs to Complete

Dundee Realty had commitments under land purchase agreements totalling $38,461,000 as at June 30, 2012 (December 31, 2011 – $55,358,000) which will become payable in future periods on the satisfaction of certain conditions pursuant to these agreements.

Letters of Credit and Surety Bonds

Dundee Realty is contingently liable for letters of credit and surety bonds that have been provided to support land and condominium developments in the amount of $65,302,000 at June 30, 2012 (December 31, 2011 – $60,520,000). Dundee Realty is also contingently liable for letters of credit that have been provided to support its equity accounted investments in the amount of $44,860,000 (December 31, 2011 – $42,872,000).

Joint Ventures and Co-ownerships

Dundee Realty may conduct its real estate activities from time to time through joint ventures with third party partners. The Corporation is contingently liable for the obligations of the other owners of the unincorporated joint ventures in the amount of $52,442,000 as at June 30, 2012 (December 31, 2011 – $41,800,000). The Corporation would have available to it the other venturers' share of assets to satisfy the obligations that may arise.

Legal Contingencies

As part of the business reorganization of the capital markets activities of DundeeWealth (note 4), Dundee Capital Markets agreed to indemnify certain subsidiaries of DundeeWealth with respect to certain claims. In 2011, Sino-Forest Corporation ("Sino-Forest") was delisted from the TSX, following allegations of securities violations. One of the parties indemnified by Dundee Capital Markets participated in underwriting syndicates in respect of several public equity offerings by Sino-Forest. Dundee Capital Markets understands that the indemnified party is a defendant in at least one lawsuit brought by shareholders of Sino-Forest, alleging securities law and other violations. Sino-Forest received an order for creditor protection in March 2012, which may impact this lawsuit. In April 2012, Sino-Forest and certain of its current and former executives received enforcement notices from the Ontario Securities Commission and the regulator commenced formal proceedings against them alleging fraud and securities law violations in May 2012. It is not known if others will be named as respondents in the future. Dundee Capital Markets cannot reliably estimate the timing and quantification of any exposure it may have as a result of the Sino-Forest underwritings, the consequences of which could be material.

The Corporation is also a defendant in various other legal actions. The defenses to these claims and the quantification of damages are yet to be determined and the amount of the loss, if any, cannot be determined at this time. The Corporation intends to vigorously defend itself against all legal claims. Although the ultimate outcome of these matters cannot be ascertained at this time and the results of legal proceedings cannot be predicted with certainty, it is the opinion of management, based on information currently available, that these are not material liabilities, adequate provisions have been made for any liabilities and the resolution of these matters will not have a material adverse effect on the consolidated financial position of the Corporation.

34. RELATED PARTY TRANSACTIONS

There have been no significant changes in the nature and scope of related party transactions to those described in note 36 to the Corporation's 2011 Audited Consolidated Financial Statements.

35. SEGMENTED INFORMATION

Segmented information is provided based on operating segments, consistent with how the Corporation manages its business and how it reviews its performance. The Corporation operates in five operating segments, which are organized predominantly by the products and services provided to customers.

Real Estate

The real estate segment consists of the land and housing activities of Dundee Realty. These activities are supplemented by a portfolio of select investment and income-producing properties. The Corporation's real estate segment includes several equity accounted investments, including the Corporation's 24% interest in Dundee International REIT and its 6% interest in Dundee REIT.

Resource

Activities in the resource segment are primarily carried out through Dundee Energy and Eurogas International Inc. ("EII"). Dundee Energy and EII have interests in southern Ontario, Spain and Tunisia. The Corporation's interest in Dundee Precious Metals Inc. and other resource-based investments, several of which are accounted for using the equity method, are also included in this segment.

Agriculture

The Corporation's agriculture segment was established through its acquisition of Blue Goose (note 5) in December 2011. Blue Goose is a privately owned Canadian company in the organic and natural beef production market.

Asset Management

The Corporation's asset management activities are carried out through GIC and DREAM. GIC and DREAM provide sub-advisory and investment services to third party assets under management and to the Corporation's portfolio of AFS securities, real estate assets and infrastructure projects. In addition, the asset management segment also includes general corporate overhead costs, as well as interest and debt servicing costs, to the extent that such costs have not been specifically allocated to any other operating segment.

Capital Markets

Dundee Capital Markets provides investment banking, institutional equity sales and trading and equity research activities with a principal focus on resources, real estate and infrastructure, diversified industries and special situations, complementing the core focus areas of the Corporation's asset management activities. Dundee Capital Markets is also the manager of certain flow-through resource limited partnership investment management products.
