CORPORATE VISION AND STRATEGIC DIRECTION

Dundee's strategy to create long-term value for shareholders is built on its legacy of successful investing in businesses within industries it knows well. Dundee has assembled a team of seasoned professionals with deep knowledge of wealth management, natural resources, agriculture and real estate. Relying on a collaborative approach, the merchant capital group at Dundee brings a focused approach to investing. This discipline manifests itself through the rigorous allocation of capital to help ensure investee companies are independent, successful and ultimately able to raise capital on their own.

The Corporation has taken steps to rationalize its merchant capital portfolio, focusing on those investments that the Corporation considers core to its expertise and aligned to its objectives of sustainable growth and value for shareholders. The Corporation believes that it has implemented core strategies to ensure that its portfolio is well positioned for a future recovery in commodity prices.

In parallel, a key strategic priority for Dundee is the establishment of a wealth management business focused on the high-net-worth and ultra-high-net-worth markets, supported by top quality investment products, and managed by a team of experienced portfolio managers. The Corporation believes that over time, the successful execution of the wealth management strategy will help generate more regular and predictable cash flows from a combination of asset management and performance based fees.
